Review of the Board of Directors

Market Situation and Sales

Year 2009 started quite well although the general downturn in the world economy started to influence also fishing tackle market in the end of 2008. The strong weakening of many currencies increased the pressure on consumer confidence in East Europe and started quickly to reduce the purchase power in the region. At the same time, market situation especially in West Europe and Nordic countries continued quite weak but confidence in Asia and Australia continued to pick-up. During the third quarter, both European and North American markets started to gradually strengthen. In North America, orders especially for lures increased during the second half of the year. In the fourth quarter, sales of products for winter sports increased as a result of good snow situation in Europe. The improved sales performance in the latter part of the year was though diluted by the weak currencies in many European countries.

Net sales for 2009 decreased 3% to EUR 234.6 million (EUR 243.0 million). US dollar (USD) strengthened 5% from previous year but many currencies especially in East Europe and Scandinavia weakened strongly. The net effect of the currency movements decreased the 2009 net sales by EUR 5.0 million. With comparable exchange rates, net sales decreased 1%.

Net sales of Group Fishing Products, boosted by the new sales of Sufix fishing lines, were up 6% in 2009. Net sales of Other Group Products decreased 27% as a result of reduced sales of gift products and subcontracting services while sales of Peltonen cross-country skis increased markedly. Net sales of Third Party Products decreased 9% mainly due to the weakening of many East European and Scandinavian currencies and reduced sales of higher price category products like fishing electronics and expensive reels and hunting equipment.

Supported by the strengthening of USD, the net sales in North America increased 6%. In the Nordic Countries, the net sales decreased 4% as a result of reduced distribution volumes of especially hunting products and weakening of Swedish and Norwegian crowns. Net sales in Rest of Europe were down by 11% due to difficult market situation and weakened currencies in East Europe. Net sales in Rest of the World increased 2% as a result of the new sales of Sufix products and strengthening of USD while the sales of gift products fell strongly.

For more detailed segment information, see the note 2 to the consolidated financial statements.

KEY FIGURES

| EUR million | 2009 | 2008 |
|---|-------|-------|
| Net sales | 234.6 | 243.0 |
| EBITDA | 28.9 | 37.5 |
| Operating profit | 22.1 | 31.3 |
| Profit before taxes | 19.9 | 26.5 |
| Net profit for the period | 14.3 | 19.2 |
| Employee benefit expenses | 53.8 | 57.5 |
| Average personnel for the period, persons | 2 259 | 4 143 |
| Research and development expenses as a percentage of net sales, % | 2.0 | 1.8 |
| | 0.9 | 0.7 |
| Net cash generated from operating activities | 24.6 | 5.4 |
| Total net cash used in investing activities | 6.3 | 6.8 |
| Net interest-bearing debt at the end of the period | 79.4 | 89.5 |
| Equity-to-assets ratio at the end of the period, % | 42.8 | 38.0 |
| Debt-to-equity ratio (gearing) at the end of the period, % | 71.1 | 86.4 |
| Return on equity, % | 13.3 | 19.2 |

MANAGEMENT ANALYSIS

| EUR million | 2009 | 2008 |
|--|--------------|--------------|
| Net sales as reported | 234.6 | 243.0 |
| Foreign exchange effects | 5.0 | |
| Net sales with comparable exchange rates | 239.6 | 243.0 |
| Operating profit as reported | 22.1 | 31.3 |
| Operating profit margin, % | 9.4 | 12.9 |
| Non-recurring items (net) | 1.4 | -0.8 |
| Comparable operating profit | 23.5 | 30.5 |
| Comparable operating profit margin, % | 10.0 | 12.6 |

Financial Results and Profitability

Operating profit for 2009, excluding non-recurring items, amounted to EUR 23.5 million (EUR 30.5 million). It was strongly affected by reduction of sales and negative currency movements in Scandinavia and East Europe. Profitability was also affected by liquidation campaigns arranged in several countries to reduce inventories as part of the ongoing working capital project. On the other hand, fixed costs were down 3% as a result of several performance improvement initiatives carried out during the last two years. Comparable operating margin for the year was 10.0% (12.6%).

Reported operating profit for 2009 was EUR 22.1 million (EUR 31.3 million) including non-recurring costs and impairment losses of EUR 1.9 million and a non-recurring gain of EUR 0.5 million from the sale of office premises in Hong Kong (net gain of EUR 0.8 million in 2008). Most of these non-recurring costs and impairment losses relate to the restructure of the operating model in the Group's Chinese manufacturing operations and in Hungarian distribution unit. Reported operating margin was 9.4% (12.9%) and return on capital employed 11.5% (16.9%).

Operating profit of Group Fishing Products decreased to EUR 15.7 million (EUR 19.5 million) as a result of currency movements and stock-clearance sales. Operating profit of Other Group Products fell to EUR 0.5 million (EUR 1.6 million) due to the strong fall in sales. Operating profit of Third Party Products decreased to EUR 5.8 million (EUR 10.3 million) due to negative currency movements and reduced sales. For more detailed segment information, see the note 2 to the consolidated financial statements.

Financial (net) expenses were EUR 2.1 million (EUR 4.8 million) including net interest expenses of EUR 3.5 million (EUR 5.1 million) and (net) currency exchange gains of EUR 1.5 million (EUR 0.4 million).

Net profit for the year decreased to EUR 14.3 million (EUR 19.2 million) and earnings per share to 0.31 EUR (0.45 EUR). For more share related and other key figures for 2005–2009, see pages 41–42. Definitions of key figures are on the page 17.

Cash Flow and Financial Position

As a result of the strong execution of working capital management, inventories decreased EUR 5.6 million and non-interest bearing assets, mainly trade

receivables, decreased EUR 6.6 million. Accordingly, the cash flow from operating activities more than fourfolded to EUR 24.6 million (EUR 5.4 million).

Net cash used in investing activities amounted to EUR 6.3 million (EUR 6.8 million). In addition to the normal capital expenditure of EUR 6.7 million (EUR 7.1 million) and EUR 2.1 million (EUR 2.0 million) of acquisitions, it included a EUR 0.1 million (EUR 0.0 million) change in interest-bearing receivables and EUR 2.6 million (EUR 2.2 million) proceeds from sales of assets. For more detailed information on acquisitions and disposals, see the note 3 to the consolidated financial statements.

Net interest-bearing debt decreased to EUR 79.4 million (Dec 2008: EUR 89.5 million) as cash was released from working capital. The liquidity of the Group remained good through the year. Equity-to-assets ratio improved and reached 42.8% (Dec 2008: 38.0%). Also gearing improved and decreased to 71.1% (Dec 2008: 86.4%).

Strategy Implementation

Implementation of the Group's strategy for profitable growth continued in 2009 with high emphasis on making a positive turnaround in cash flow and finalizing the new operating model in the Chinese manufacturing operations.

The results of the major working capital initiative kicked off in late 2008 to reduce Group inventories and improve cash flow started to capitalize during the second quarter with further progress during the second half of the year. To support this development, a major supply chain and logistics initiative to shorten the lead-times, lower the inventories and further improve the service levels to customers, was started in 2009 including an implementation of a common logistics software covering the Group's manufacturing and distribution units globally. This project continues and further results are expected in 2010. The reduction of inventories started quicker in Group products and therefore, the further decrease of inventories in 2010 is expected especially in third party products for which the purchasing volumes were adjusted accordingly already during 2009.

The performance improvement initiatives started in 2008 at the Group's manufacturing facilities in China were finalized in 2009. With the new set-up of four Group-owned factories and a network of dozens of outsourcing partners, Rapala can adjust capacity quicker and more accurately to meet the market requirements. The benefits will also include shorter lead-times and improved service levels. As a result of the new operating model, the Group has reduced its headcount in China considerably. Accordingly, the headquarters of Chinese manufacturing operations in Hong Kong moved into smaller leased premises in the end of the year and the old office was sold. This resulted in a EUR 0.5 million non-recurring gain.

The integration of Sufix fishing line business acquired in 2008 was completed

in 2009. Rapala intends to increase its worldwide fishing line sales to some EUR 20 million in the next few years. The long-term strategic target for Rapala is to increase its annual fishing line sales to EUR 30–50 million.

Discussions and negotiations regarding acquisitions and business combinations continued in 2009. In December, Rapala acquired the fish pheromone brand Ultrabite and signed an exclusive agreement to commercialize this patented pheromone technology to the sport fishing market worldwide. Rapala's sales of products including pheromones were less than EUR 2 million in 2009 but it is expected that the sales will grow substantially in the future as the newly developed products will be sold through the Group's worldwide distribution network with further new products being developed and introduced.

To further expand and strengthen its distribution network, Rapala established a new distribution company in Romania in 2009. The Group also started the process to establish new distribution companies in Iceland and Belarus as well as a specialized distribution company for gift products in China. These units have started or will start their operations in the first quarter of 2010.

In addition, the Group introduced and implemented several other performance improvement initiatives like further development of lure manufacturing processes and restructuring of Hungarian distribution operations. Also development of organic growth in terms of extensions of current product categories as well as special marketing, sales and brand initiatives continued.

Personnel and R&D

Number of personnel decreased 29% during the year and was 2 271 (3 197) at the year-end. This change resulted mainly from the new operating model in the manufacturing operations in China. At the same time, the Group has further strengthened its organizations in the fastest growing markets. The average number of personnel decreased 45% to 2 259 (4 143). For more detailed information on personnel see note 7 to the consolidated financial statements and the section "Corporate Responsibility and Sustainable Development" attached to the consolidated financial statements.

Research and development expenses increased 11% to EUR 2.0 million (EUR 1.8 million) in 2009.

Risk Management, Internal Controls and Corporate Responsibility

In 2009, increased attention was paid to risk management, internal controls and corporate responsibility. Both internal controls and risk management were developed and reviewed through several projects and actions during the year. In addition, the Board redefined and approved its updated Corporate Governance

Statement, which is available at the website www.rapala.com.

The work to further develop actions and reporting within corporate responsibility progressed. In addition to the implementation and development of environmental measurements, actions were taken to widen the reporting of corporate responsibility to economic and social responsibility.

The principles for Group's risk management and corporate responsibility as well as the work done and progress made in these areas are described in more detail in the sections "Risk Management" and "Corporate Responsibility and Sustainable Development" attached to the consolidated financial statements.

For information on shareholders, shareholder agreement, shares, options and board authorizations, see the sections "Shares and Shareholders" attached to the consolidated financial statements. Transactions with related parties are disclosed in the note 28 to the consolidated financial statements.

Short-term Outlook

While the general market situation did not change a lot during 2009, positive signs were witnessed in several countries during the second half of the year. In addition, good winter weather conditions have recently boosted the sales of winter sports equipment in the Nordic countries. The general uncertainty in the world economy may continue in 2010 through increased unemployment in many countries, which will most likely continue to affect the ordering behavior of many customers and maintain the need for quick deliveries and short lead-times. In general though, the short-term outlook is cautiously optimistic.

In this economic and market situation, it is expected that both the net sales and the operating margin excluding non-recurring items will increase from 2009 even if the Group continues to reduce its inventories.

While the Group continues to implement its strategy for profitable growth, reducing working capital and increasing cash flow continue to be the top priority for 2010 together with strong emphasis on innovation and development of new products.

At the end of 2009, the Group's order backlog was up 13% at EUR 43.8 million (EUR 38.6 million). Orders for Group branded lures and winter sports equipment have recently been on a record level. Accordingly, the Group lure manufacturing facilities and the Peltonen cross country ski factory are currently running at full capacity.

Proposal for Profit Distribution

The Board of Directors proposes to the Annual General Meeting that a dividend of EUR 0.19 per share for 2009 (2008: EUR 0.19) be paid from the Group's distributable equity and that any remaining distributable funds be allocated to retained earnings. At December 31, 2009, the parent company's distributable equity totaled EUR 42.6 million.

No material changes have taken place in the Group's financial position after the end of the financial year 2009. Group's liquidity is good and the view of the Board of Directors is that the distribution of the proposed dividend will not undermine this liquidity.

Helsinki, February 4, 2010

Board of Directors of Rapala VMC Corporation

Auditors' Report

To the Annual General Meeting of Rapala VMC Corporation

We have audited the accounting records, the financial statements, the report of the Board of Directors, and the administration of Rapala VMC Corporation for the year ended on December 31, 2009. The financial statements comprise the consolidated statement of financial position, income statement, statement of comprehensive income, statement of changes in equity, statement of cash flow and notes to the consolidated financial statements, as well as the parent company's statement of financial position, income statement, statement of cash flow and notes to the financial statements.

The Responsibility of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the financial statements and the report of the Board of Directors and for the fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, as well as for the fair presentation of the financial statements and the report of the Board of Directors in accordance with laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The Board of Directors is responsible for the appropriate arrangement of the control of the company's accounts and finances, and the Managing Director shall see to it that the accounts of the company are in compliance with the law and that its financial affairs have been arranged in a reliable manner.

Auditor's Responsibility

Our responsibility is to perform an audit in accordance with good auditing practice in Finland, and to express an opinion on the parent company's financial statements, on the consolidated financial statements and on the report of the Board of Directors based on our audit. Good auditing practice requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements and the report of the Board of Directors are free from material misstatement and whether the members of the Board of Directors of the parent company and the Managing Director have complied with the Limited Liability Companies Act.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements and the report of the Board of Directors. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements or of the report of the Board of Directors,

whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements and the report of the Board of Directors in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements and the report of the Board of Directors.

The audit was performed in accordance with good auditing practice in Finland. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion on the Consolidated Financial Statements

In our opinion, the consolidated financial statements give a true and fair view of the financial position, financial performance, and cash flows of the group in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

Opinion on the Company's Financial Statements and the Report of the Board of Directors

In our opinion, the financial statements and the report of the Board of Directors give a true and fair view of both the consolidated and the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The information in the report of the Board of Directors is consistent with the information in the financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ACCOUNTING PRINCIPLES FOR THE CONSOLIDATED ACCOUNTS

COMPANY'S BACKGROUND

Rapala VMC Oyj ("Company") is a Finnish public limited liability company organized under the laws of Finland, domiciled in Asikkala and listed on the NASDAQ OMX Helsinki stock exchange since 1998. The parent company Rapala VMC Oyj and its subsidiaries ("Rapala" or "the Group") operate in some 30 countries and the Company is one of the leading fishing tackle companies in the world.

The Board of Directors of the Company has approved these financial statements for publication at its meeting on February 3, 2010. Under Finland's Companies Act, shareholders have the option to accept or reject the financial statements in a meeting of shareholders, which will be held after the publication of the financial statements. The meeting has also the option of changing the financial statements.

A copy of the consolidated financial statements is available at the Group's website www.rapala.com or from Arabiantkatu 12, 00560 Helsinki, Finland.

BASIS FOR PREPARING THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), including IAS and IFRS standards as well as the SIC and IFRIC interpretations in effect on December 31, 2009. The term 'IFRS standards' refers to standards and interpretations which are approved and adopted by the European Union (regulation EY 1606/2002) and thus are in force in the Finnish legislation. The Group has not early adopted any new, revised or amended standards or interpretations.

The consolidated financial statements have been prepared on a historical cost basis, unless otherwise stated. The consolidated financial statements are presented in millions of euros.

APPLIED NEW AND AMENDED STANDARDS AND INTERPRETATIONS

The Group adopted in 2009 the following new, revised or amended standards and interpretations:

- IFRS 2 Share-based Payment (amendment). This amendment affects the consideration and treatment of vesting conditions and the cancellations of share-based payments in the financial statement. This amendment did not have an effect on the Group's financial statements.
- IFRS 7 Financial Instruments: Disclosures (amendment): This amendment includes new presentation requirements about the methods how financial instruments' fair values are determined. This amendment had an effect on Note 23 of the consolidated financial statements.
- IFRS 8 Operating Segments: According to this new standard, segment information is required to be reported on the basis that management uses internally

for evaluating operating segment performance and deciding how to allocate resources to operating segments (management approach). The Group's IFRS 8 based segments are Group Fishing Products, Other Group Products and Third Party Products. This change had an effect on the presentation of Note 2 in the consolidated financial statements.

- IAS 1 Presentation of Financial Statements (amendment): Adoption of this amended standard had an effect on the presentation of the consolidated income statement, the consolidated statement of comprehensive income and the consolidated statement of changes in equity as well as the notes for these statements.
- IAS 23 Borrowing costs (amendment): This revised standard requires to capitalize borrowing costs as part of the cost of assets that take a substantial period of time to get ready for use or sale. This amendment did not have an effect on the Group's financial statements.
- IAS 32 Financial Instruments: Presentation and IAS 1 Presentation of Financial Statements (amendments). These amendments have an effect on puttable financial instruments and obligations arising on liquidation. These amendments did not have an effect on the Group's financial statements.
- IAS 39 Financial Instruments: Recognition and Measurement and IFRIC 9 Reassessment of embedded derivatives (amendments): These amendments influence the treatment of embedded derivatives. These amendments did not have an effect on the Group's financial statements.
- IFRIC 13 Customer Loyalty Programmes: This interpretation addresses entities that grant loyalty award credits to customers. This interpretation did not have an effect on the Group's financial statements.
- IFRIC 15 Agreements for the Construction of Real Estate: This interpretation applies to the accounting for revenue and associated expenses by entities that undertake the construction of a real estate directly or through subcontractors. This interpretation did not have an effect on the Group's financial statements.
- IFRIC 16 Hedges of a Net Investment in a Foreign operation: This interpretation applies to entities that hedge the foreign currency risk arising from its net investments in foreign operations and wishes to qualify for hedge accounting in accordance with IAS 39. This interpretation provides guidance on identifying the foreign currency risks that qualify as a hedged risk in the hedge of a net investment in a foreign operation. This interpretation did not have an effect on the Group's financial statements.

Additionally, the IFRS standards' annual improvement project's amendments which have been approved for application in the EU, have been taken into account in the consolidated financial statements.

ADOPTION OF NEW AND AMENDED STANDARDS AND INTERPRETATIONS

In 2010, the Group will adopt the following new, revised or amended standards and interpretations:

- IFRS 2 Share-based Payment (amendment; effective for annual periods beginning on or after January 1, 2010). This amendment influences the treatment of cash-settled share-based payment transactions in the separate financial state-

ments of group companies. The Group estimates that the amendment will not have a material impact on the Group's consolidated financial statements. This amendment has not yet been approved for application in the EU.

- IFRS 3 Business Combinations (revision) and IAS 27 Consolidated and Separate Financial Statements (amendment) (effective for annual periods beginning on or after July 1, 2009). Amendments of standards IFRS 3 and IAS 27 will have a significant impact on the accounting of future business combinations. The main changes to existing requirements or practice are: measurement of non-controlling interests, step acquisitions, acquisition related costs and contingent consideration.
- IAS 39 Financial Instruments: Recognition and Measurement (amendment; effective for annual periods beginning on or after July 1, 2009). This amendment influences eligible hedged items. The Group estimates that the amendment will not have a material impact on the Group's financial statements.
- IFRIC 17 Distributions of Non-cash Assets to Owners (effective for annual periods beginning on or after July 1, 2009). IFRIC 17 clarifies that an entity should measure the dividend payable at the fair value of the net assets to be distributed and that an entity should recognize the difference between the dividend paid and the carrying amount of the net assets distributed in profit or loss. The Group estimates that the interpretation will not have a material impact on the Group's financial statements.
- IFRIC 18 Transfers of Assets from Customers (due to EU's late acceptance of this interpretation, it is effective in EU for transfers of assets from customers received on or after January 1, 2010): This interpretation applies to entities that receive transfers of property, plant and equipment from their customers. The Group estimates that this interpretation will not have an impact on the Group's financial statements.

In 2011 or later, the Group will adopt the following new, revised or amended standards and interpretations:

- IFRS 9 Financial Instruments (effective for annual periods beginning on or after January 1, 2013; earlier adoption possible). This new standard will gradually replace the current standard 'IAS 39 Financial Instruments: Recognition and Measurement'. The Group investigates this new standard's impact on the Group's consolidated financial statements. This first part of the new standard has not yet been approved for application in the EU.
- IAS 24 Related Party Disclosures (revised; effective for annual periods beginning on or after January 1, 2011). The Group estimates that the revision will not have a material impact on the Group's consolidated financial statements. This revision has not yet been approved for application in the EU.
- IAS 32 Financial Instruments: Presentation (amendment; effective for annual periods beginning on or after February 1, 2010). The amendment influences the classification of foreign-currency-denominated rights issues. The Group estimates that the amendment will not have a material impact on the Group's consolidated financial statements.
- IFRIC 14 Prepayments of a Minimum Funding Requirement (amendment; effective for annual periods beginning on or after January 1, 2011). The Group estimates that the amendment will not have a material impact on the Group's

consolidated financial statements. This amendment has not yet been approved for application in the EU.

- IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments (effective for annual periods beginning on or after July 1, 2010). The Group estimates that the interpretation will not have a material impact on the Group's consolidated financial statements. This interpretation has not yet been approved for application in the EU.

CONSOLIDATION PRINCIPLES

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries in which it holds, directly or indirectly, over 50% of the voting rights or other governing power. The financial statements of the subsidiaries are prepared for the same reporting year as the Company, using consistent accounting policies.

Acquired subsidiaries are accounted for using the acquisition cost method, according to which the assets and liabilities of the acquired company are measured at fair value at the date of acquisition. The excess acquisition cost over the fair value of net assets acquired is recognized as goodwill. If the cost of acquisition is less than the fair value of the Group's share of the net assets acquired, the difference is recognized directly through income statement. Goodwill on consolidation is not amortized but tested for impairment annually. In accordance with the exemption under IFRS 1, acquisitions prior to the IFRS transition date, January 1, 2004, have not been restated and these values are according to the previous financial statement standards. The consolidated financial statements include the results of acquired companies for the period from the completion of the acquisition. Conversely, divestments are included up to their date of sale.

Associated companies, where the Group holds voting rights of 20–50% and in which the Group has significant influence, but not control, are included in the consolidated financial statements using the equity method. Under the equity method, the Group's share of the associate's profit or loss for the year is recognized in the consolidated income statement after operating profit. The Group's interest in an associated company is carried in the balance sheet at an amount that reflects its share of the net assets of the associate together with goodwill on acquisition, as amortized, less any impairment. Unrealized gains, if any, between the Group and associated companies are eliminated to the extent of the Group's holding. Associated companies' financial statements have been converted to correspond with the accounting principles in use in the Group. When the Group's share of losses exceeds the carrying amount of an investment, the carrying amount is reduced to nil and any recognition of further losses ceases unless the Group has incurred obligations in respect of the associated companies.

The investments in subsidiaries have been eliminated using the acquisition cost method. All transactions between Group companies as well as assets and liabilities, dividends and unrealized internal margins in inventories and tangible assets have been eliminated in the consolidated financial statements. Minority interest is presented separately from the net profit and disclosed as a separate item in the equity in accordance with the share of the minority interest. Minority interest of accrued losses is recognized in the consolidated financial statements

up to a maximum of the amount of the investment. Acquisitions of minority interest are accounted for using the parent entity extension method, according to which the difference between the consideration and the carrying value of the share of the net assets acquired is recognized as goodwill. Disposals of minority interest are also accounted for using the parent entity extension method, according to which the Group's gain/loss from the disposal is recognized in the income statement. Calculation of Group's gain/loss from the disposal should also include the disposed share of previously recognized goodwill, which is also seen as being disposed of.

FOREIGN CURRENCY TRANSACTIONS AND TRANSLATIONS

Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. Non-monetary items denominated in foreign currency, measured at fair value, are translated using the exchange rates at the date when the fair value was determined. Other non-monetary items have been translated into the functional currency using the exchange rate on the date of the transaction. Foreign exchange gains and losses for operating business items are recorded in the appropriate income statement account before operating profit. Foreign exchange gains and losses from the translation of monetary interest-bearing assets and liabilities denominated in foreign currencies are recognized in financial income and expenses. Exchange differences arising on a monetary item that forms a part of a net investment in a foreign operation are recognized in the statement of other comprehensive income and recognized in profit or loss on disposal of the net investment.

The consolidated financial statements are presented in euros, which is the Company's functional and reporting currency. Income statements of subsidiaries, whose functional and reporting currency is not euro, are translated into the Group reporting currency using the average exchange rate for the year. Their balance sheets are translated using the exchange rate of balance sheet date. All exchange differences arising on the translation are entered in the statement of other comprehensive income and presented in equity. The translation differences arising from the use of the purchase method of accounting and after the date of acquisition as well as fair value changes of loans which are hedges of such investments are recognized in statement of other comprehensive income and presented in equity. On the disposal of a subsidiary, whose functional and reporting currency is not euro, the cumulative translation difference for that entity is recognized in the income statement as part of the gain or loss on the sale.

Any goodwill arising on the acquisition of a foreign company and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign subsidiary and translated using the exchange rate of balance sheet date. Goodwill and fair value adjustments arising from the acquisition prior to January 1, 2004 have been

treated as assets and liabilities of the Group, i.e. in euros.

REVENUE RECOGNITION

Net sales comprise of consideration received less indirect sales taxes, discounts and exchange rate differences arising from sales denominated in foreign currency. Sales of goods are recognized after the significant risks and rewards of ownership of the goods have passed to the buyer and no significant uncertainties remain regarding the consideration, associated costs and possible return of goods. The costs of shipping and distributing products are included in other operating expenses. Revenues from services are recorded when the service has been performed.

Rental income arising from operating leases is accounted for on a straight-line basis over the lease terms. Royalty income is recorded according to the contents of the agreement. Interest income is recognized by the effective yield method. Dividend income is recognized when the company has acquired a right to receive the dividends.

INCOME TAXES

The Group's income tax expense includes taxes of the Group companies based on taxable profit for the period, together with tax adjustments for previous periods and the change in deferred income taxes. The income tax effects of items recognized directly in other comprehensive income are similarly recognized. The current tax expense for the financial year is calculated from the taxable profit based on the valid tax rate of each country. The tax is adjusted with possible taxes related to previous periods. The share of results in associated companies is reported in the income statement as calculated from net profit and thus including the income tax charge.

Deferred taxes are provided using the liability method, as measured with enacted tax rates, to reflect the temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. The main temporary differences arise from the depreciation difference on tangible assets, fair valuation of net assets in acquired companies, intra-group inventory profits, defined benefit pension plans, inventories and other provisions, untaxed reserves and tax losses carried forward. Temporary differences are recognized as a deferred tax asset to the extent that it is probable that future taxable profits will be available, against which the deductible temporary difference can be utilized.

RESEARCH AND DEVELOPMENT COSTS

Research and development costs are expensed as they are incurred, unless they relate to a clearly defined project that meets certain criteria. Development costs for such projects are capitalized if they are separately identifiable and if the products are assessed to be technically feasible and commercially viable and the related future revenues are expected to exceed the aggregate deferred and future development costs and related production, selling and administrative expenses,

and if adequate resources exist or will be available to complete the project. Capitalized development costs include all directly attributable material, employee benefit and testing costs necessary to prepare the asset to be capable of operating in the manner intended. Research and development costs that were initially recognized as an expense are not to be capitalized at a later date.

Amortization of such a product is commenced when it is available for use. Unfinished products are tested annually for impairment. Capitalized development expenses are amortized on a straight-line basis over their expected useful lives, a maximum of five years.

GOODWILL

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net assets of the subsidiary, associated undertaking or joint venture acquired after January 1, 2004. Any costs directly attributable to the business combination, such as professional fees, are included to the cost of an acquisition. Goodwill from the combination of operations acquired prior to January 1, 2004 corresponds to the carrying amount according to the previous financial statement standards, which has been used as the assumed acquisition cost according to IFRS.

Goodwill is tested annually for impairment. For this purpose, goodwill has been allocated to cash generating units. Goodwill is measured at cost less any accumulated impairment loss, and is not amortized.

INTANGIBLE ASSETS

Intangible assets include customer relations, trademarks, capitalized development expenses, patents, copyrights, licenses and software. An intangible asset is recognized in the balance sheet only if it is probable that the future economic benefits that are attributable to the asset will flow to the Group, and the cost of the asset can be measured reliably. Intangible assets are stated at cost, amortized on a straight-line basis over the expected useful lives which vary from 3 to 15 years and adjusted for any impairment charges. Trademarks and other intangible assets whose useful life is estimated to be indefinite are estimated to affect cash flow accumulation for an undefined period of time. The expected useful life for most trademarks is indefinite and therefore they are not amortized. These intangibles are measured at cost less any accumulated impairment loss and not amortized. Intangible assets with indefinite useful lives are tested for impairment annually. The valuation of intangible assets acquired in a business combination is based on fair value as at the date of acquisition.

Expected useful lives and indefinite lives of intangible assets are reviewed at each balance sheet date and, where they differ significantly from previous estimates, depreciation periods are changed accordingly.

TANGIBLE ASSETS

Tangible assets are stated at historical cost, amortized on a straight-line basis over the expected useful life and adjusted for any impairment charges. The valuation of tangible assets acquired in a business combination is based on fair value as at the date of acquisition. Land is not depreciated as it is deemed to have an indefinite life.

Depreciation is based on the following expected useful lives:

| | |
|-------------------------|-------------|
| Buildings | 10–20 years |
| Machinery and equipment | 5–10 years |
| Other tangible assets | 3–15 years |

Expected useful lives of tangible assets are reviewed at each balance sheet date and, where they differ significantly from previous estimates, depreciation periods are changed accordingly. Ordinary maintenance and repair costs are expensed as incurred. The cost of significant renewals and improvements are capitalized and depreciated over the remaining useful lives of the related assets. Gains and losses on sales and disposals are determined by comparing the received proceeds with the carrying amount and are included in the income statement in the item other operating income and expenses.

Depreciation of a tangible asset is discontinued when the tangible asset is classified as being held-for-sale in accordance with IFRS 5 standard Non-Current Assets Held-for-sale and Discontinued Operations.

BORROWING COSTS

Borrowing costs, that are directly attributable to the acquisition, construction or production of a qualifying asset, are capitalized as part of the cost of that asset. Other borrowing costs are expensed when incurred.

GOVERNMENT GRANTS

Government or other grants are recognized in the income statement as other operating income on a systematic basis over the periods necessary to match them with the related costs, which they are intended to compensate. Government grants relating to purchase of tangible assets are recognized as revenue on a systematic basis over the useful life of the asset when there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. In the balance sheet, grants are deducted from the value of the asset they relate to. The grants are recognized to decrease depreciations over the useful life of the asset. Currently, all grants of the Group have been recognized in the income statement as other operating income.

IMPAIRMENTS OF TANGIBLE AND INTANGIBLE ASSETS

The carrying amounts of tangible and intangible assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If indication exists, the recoverable amount is measured. Indications of potential

need for impairment may be for example changes in market conditions and sales prices, decisions on significant restructurings or change in profitability. Goodwill, intangible assets with indefinite useful lives and unfinished tangible assets are in all cases tested annually. For the purposes of assessing impairment, assets are grouped at the lowest cash generating unit level for which there are separately identifiable, mainly independent, cash inflows and outflows.

An impairment loss is the amount by which the carrying amount of the assets exceeds the recoverable amount. The recoverable amount is determined by reference to discounted future net cash flows expected to be generated by the asset. Discount rate used is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment loss is immediately recognized in the income statement. Impairment losses attributable to a cash-generating unit are used to deducting first the goodwill allocated to the cash-generating unit and, thereafter, the other assets of the unit on an equal basis. The useful life of the asset to be depreciated is reassessed in connection with the recognition of the impairment loss. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount. However, the reversal must not cause that the adjusted value is higher than the carrying amount that would have been determined if no impairment loss had been recognized in prior years. Impairment losses recognized for goodwill are not reversed.

ASSETS HELD-FOR-SALE

Non-current assets (or a disposal group) are classified as held-for-sale, if their carrying amount will be recovered principally through the disposal of the assets rather than through continuing use. For this to be the case, the sale must be highly probable, the asset (or disposal group) must be available for immediate sale in its present condition subject only to terms that are usual and customary, the management must be committed to selling and the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held-for-sale (or assets included in the disposal group) are measured at the lower of carrying amount and fair value less estimated selling expenditure. After an asset has been classified as held-for-sale, it is not depreciated. If the classification criterion is not met, the classification is reversed and the asset is measured at the lower of carrying amount prior to the classification less depreciation and impairment, and recoverable amount. A non-current asset held-for-sale and assets included in the disposal group classified as held-for-sale are disclosed separately from the other asset items.

ACCOUNTING FOR LEASES

Group as a lessee

Leases of tangible assets, where the Group has substantially all the rewards and risks of ownership, are classified as finance leases. Finance leases are capitalized at the inception of the lease at the lower of the fair value of the leased asset or the estimated present value of the underlying lease payments.

Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. The corresponding rental obligations, net of finance charges, are included in interest-bearing liabilities with the interest element of the finance charge being recognized in the income statement over the lease period. Tangible assets acquired under finance lease contracts are depreciated over the shorter of the estimated useful life of the asset or lease period.

Leases of tangible assets, where the lessor retains all the risks and benefits of ownership, are classified as operating leases. Payments made there under, and under rental agreements, are expensed on a straight-line basis over the lease periods. Received incentives are deducted from the paid leases based on the time elapse of benefit.

Currently the Group does not have other arrangements that contain a lease.

Group as a lessor

Those leases under which the Group is a lessor are classified as operating leases. Leased assets are presented in the lessor's balance sheet under tangible assets according to the nature of the asset. They are depreciated over their estimated useful lives in accordance with the depreciation policy used for comparable assets in own use. Lease income is recognized in the income statement on a straight-line basis over the lease term.

FINANCIAL ASSETS

Financial assets are classified as financial assets at fair value through profit or loss, financial assets held-to-maturity, loans and receivables or available-for-sale financial assets. The Group determines the classification of its financial assets after initial recognition and, where allowed and appropriate re-evaluates this designation at each financial year-end. Financial assets include current and non-current assets and they can be interest-bearing or non-interest-bearing.

Financial assets at fair value through profit or loss include financial assets held-for-trading and financial assets designated upon initial recognition as at fair value through profit or loss. The Group has not applied the fair value option. Financial assets are classified as held-for-trading if they are acquired for the purpose of selling in the near term. All of the Group's currency derivatives, which do not qualify for hedge accounting, are classified as financial assets held-for-trading. Financial assets classified as held-for-trading are measured at fair value. Unrealized and realized changes in fair value are recognized in the income statement.

Financial assets with fixed or determinable payments and fixed maturity are classified as held-to-maturity when the Group has a positive intention and ability to hold to maturity.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are measured at amortized cost using the effective interest rate method less any allowance for impairment. Initially recognized amount includes directly attributable transaction costs. Gains and losses are recognized in the income statement when loans and receivables are derecognized, impaired, and through the amortization process.

Financial assets that are not classified in the two preceding categories are classified as available-for-sale. When available-for-sale financial assets are recognized initially, they are measured at fair value by using quota market rates and market prices, discounted cash flow analyses and other appropriate valuation models. Certain unlisted shares for which fair values cannot be measured reliably are reported at cost less impairment. The fair value changes of available-for-sale financial assets, net of tax, are recognized as other comprehensive income. Changes in fair value are transferred from the statement of other comprehensive income to the income statement when the instrument is sold or its value has fallen so that an impairment loss has to be recognized for the instrument. Purchases and sales of available-for-sale financial assets are recognized on the trade date.

DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGE ACCOUNTING

The Group is exposed to financial risks related especially to changes in foreign currency exchange rates and interest rates for loans and borrowings. Derivative financial instruments are used, from time to time, to hedge financial risk. All derivatives are initially recognized at fair value on the date derivative contract is entered into, and are subsequently remeasured at fair value on each balance sheet date. Determination of fair values is based on quoted market prices and rates, discounting of cash flows and option valuation models.

Derivatives may be designated as hedging instruments, in which case hedge accounting is applied. If hedge accounting is not applied, fair value changes in derivatives are recognized in the income statement. In the case hedge accounting is applied, the accounting for hedging instruments is dependent on the particular nature of the hedging relationship.

In cash flow hedges, changes in the fair value of derivative financial instruments that are designated and effective as hedges of future cash flows are recognized as other comprehensive income and the ineffective portion is recognized immediately in the income statement. If hedge accounting is not applied, fair value changes in derivatives are recognized in the income statement. Gains and losses from derivative instruments recognized in the income statement are presented in other operating expenses and in financial income or expenses only when the derivative instrument is assigned to interest-bearing financial assets or liabilities. Accumulated fair value changes recognized in the statement of other comprehensive income are reclassified into income statement in the period when the hedged cash flow affects income or if the hedged subsidiary is sold or liquidated.

Changes of the fair value of derivative financial instruments that are designated and qualify as fair value hedges are recorded in the income statement together with the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. If derivative financial instrument does not qualify for hedge accounting, any changes in fair value are recognized in the income statement.

Currently, the Group has short-term zero-cost currency option pair instruments to which hedge accounting is not applied but which have been made to hedge operative cash flow against exchange rate risk. The fair values of the option-pair –instruments are based on market valuations received from the bank. The Group also has 14 interest rate swaps, of which 13 are designated and

effective as cash flow hedge. The fair values of interest rate derivatives have been calculated using a discounted cash flow method and are received from the bank. Currently, the Group does not have any fair value hedges or embedded derivatives.

Hedge accounting is applied to hedges of net investment in the foreign subsidiaries. Group hedges its net investments in foreign subsidiaries using currency loans. Hedges of net investments in foreign subsidiaries are recorded in the same way as cash flow hedges. Effective portion of changes in the fair value are recognized in translation differences in the statement of other comprehensive income and the ineffective portion is recognized in financial income and expenses. Accumulated fair value changes recognized in the items of other comprehensive income are reclassified into income statement if the hedged subsidiary is sold or liquidated.

If hedge accounting is applied, hedging programs are documented according to the requirements of IAS 39 and designated hedging instruments are subject to prospective and retrospective testing of effectiveness.

INVENTORIES

Inventories are valued at the lower of cost or net realizable value. Cost is determined by the first-in, first-out (FIFO) method or, alternatively, weighted average cost where it approximates FIFO. The cost of finished goods and work in progress comprises raw materials, direct labor, depreciation, other direct costs and related production overheads, but excludes borrowing costs. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

TRADE RECEIVABLES

Trade receivables are carried at their anticipated realizable value, which is the original invoice amount less an estimated valuation allowance. A credit loss allowance of trade receivables is made when there is objective evidence (such as significant overdue of receivables and unsuccessful dunning attempts or known financial difficulties and thus increased probability of customer insolvency) that the Group will not be able to collect all amounts due according to the original terms of the receivables. The assessment and decision for credit loss allowances is done locally in each business unit on case-by-case –basis.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Bank overdrafts are included within borrowings in current interest-bearing loans.

OWN SHARES

Own shares acquired by the Group, including directly attributable costs, are presented as a deduction from the total equity in the consolidated financial statements. Purchases or subsequent sales of treasury shares are presented as changes in equity.

FINANCIAL LIABILITIES

Financial liabilities are initially recognized at the fair value of the consideration received plus directly attributable transactions costs. After initial recognitions, they are subsequently measured at amortized cost using the effective interest method. Also commercial paper programs are measured at amortized cost. Gains and losses are recognized in the income statement when the liabilities are derecognized, impaired and through the amortization process.

Financial liabilities include current and non-current liabilities and they can be interest-bearing or non-interest-bearing. Contingent considerations of business combinations are classified as non-interest-bearing financial liabilities.

RECOGNITION AND DERECOGNITION OF FINANCIAL ASSETS AND LIABILITIES

Financial assets and liabilities, except for derivatives and available-for-sale financial assets, are recognized at the settlement date.

A financial asset or a financial liability is recognized on the balance sheet when, and only when, the Group becomes a party to the contractual provisions of the financial instrument.

A financial asset is derecognized when, and only when the contractual rights to the cash flows from the financial asset expire or when it transfers the financial asset, so that all the risks and rewards of ownership of the financial asset are substantially transferred. A financial liability or a part of a financial liability is removed from the balance sheet when, and only when, it is extinguished, that is when the obligation specified in the contract is discharged or cancelled or expires.

IMPAIRMENT OF FINANCIAL ASSETS

The Group assesses at each balance sheet date whether a financial asset or group of financial asset is impaired. An impairment loss in respect of loans and receivables is measured as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate. An impairment loss in respect of an available-for-sale financial asset is measured as a difference between its acquisition costs and its current fair value, less any impairment loss on that financial asset previously recognized in the income statement. An impairment loss in respect of an unquoted equity instrument that is not carried at fair value, because its fair value cannot be reliably measured, is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

All impairment losses are recognized in the income statement. Any cumulative loss in respect of an available-for-sale financial asset recognized previously in the items of other comprehensive income is reclassified into income statement.

A previously recognized impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized. For financial assets amortized at cost and available-for-sale financial assets that are debt securities, the reversal is recognized in the income statement. For available-for-sale financial assets that are equity securities, the reversal is recognized in the statement of other comprehensive income. An impairment loss in respect of an unquoted equity instrument that is not carried at fair value, because its fair value cannot be reliably measured, cannot be reversed.

PROVISIONS

Provisions are recognized in the balance sheet when the Group has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. Provisions are valued at the net present value of the expenses required to cover the obligation. The discount factor used when calculating present value is selected so that it describes the market view of the time value of the money and the risk relating to the obligation at the time of examination.

A warranty provision is recognized when a product containing a warranty clause is sold. The size of the sum involved is determined on the basis of what is known about past warranty costs. A restructuring provision is recognized when the Group has compiled a detailed restructuring plan, launched its implementation or has informed the parties concerned.

WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT

The Group is a distributor of electrical equipment that falls under the EU Directive on Waste Electrical and Electronic Equipment. Expected costs are recognized as part of other operating expenses and as a current non-interest-bearing payable.

EMPLOYEE BENEFITS

Pension obligations

Throughout the Group operates various pension plans in accordance with local conditions and practices. The plans are classified as either defined contribution plans or defined benefit plans. The contributions to defined contribution plans are charged to the income statement in the year to which they relate.

The Group operates defined benefit pension plans only in France and Sweden. In 2008, a defined benefit pension plan was in place also in Canada. For defined benefit plans, pension costs are assessed using the projected unit credit actuarial valuation method, in which the costs of providing pensions is charged to the income statement so as to spread the regular cost over the service

lives of employees in accordance with the advice of qualified actuaries who carry out a full valuation of the plan. The pension obligation is measured as the present value of estimated future cash outflows. Defined benefit liability comprises of the present value of the defined benefit obligation less past service and actuarial gains and losses not yet recognized and less the fair value of plan assets. All actuarial gains and losses are recognized in the income statement over the average remaining service lives of employees, to the extent that they exceed 10% of pension obligations or the fair value of plan assets. The past service cost is recognized as an expense on a straight-line basis over the average period until the benefits become vested. If the benefits are already vested immediately following the introduction of, or change to, a pension plan, past service cost is recognized immediately. In accordance with the exemption under IFRS 1, all cumulative actuarial gains and losses have been recognized in retained earnings at the date of transition, January 1, 2004.

Share-based payments

The Group has applied the requirements of IFRS 2 (Share-based Payments) to all share-based payment programs granted after November 7, 2002 that were unvested as of January 1, 2005. The Group has three separate share-based payment programs: one share option program, one synthetic option program settled in cash and one share reward program. Share-based payment programs are valued at fair value on the grant date and recognized as an expense in the income statement during the vesting period with a corresponding adjustment to the equity or liability. In the cash settled option program the liability is revalued at each balance sheet date with changes in fair value recognized in the income statement. The income statement effect of the share-based payment programs is recognized in employee benefit expenses.

The expense of the share-based payments determined at the grant date reflects the Group's estimate of the number of options or share rewards that will ultimately vest. Grant date is the date at which the entity and another party agree to a share-based payment arrangement, being when the entity and the counterparty have a shared understanding of the terms and conditions of the arrangement. The options are valued at fair value using Black-Scholes option-pricing model. The non-market criteria are not included in the fair value of the option but taken into account in the number of options that are assumed to vest. On a regular basis the Group reviews the assumptions made and revises its estimates of the share-based payments that are expected to be settled. The changes in the estimates are recognized in the income statement with a corresponding adjustment to the equity or liability.

When the share options are exercised, the proceeds received, net of any transaction costs, are credited to share capital (nominal value) and share premium fund.

DIVIDENDS

The dividend proposed by the Board of Directors is not deducted from distributable equity until approved by the Annual General Meeting of Shareholders.

EARNINGS PER SHARE

Earnings per share is calculated by dividing the net profit attributable to the shareholders of the Company by the weighted average number of shares in issue during the year, excluding shares purchased by the Group and held as treasury shares, if any.

Diluted earnings per share amounts have been calculated by applying the "treasury stock" method, as if the options were exercised at the beginning of the period, or on the issuance of options, if that occurs later during the period, and as if the funds obtained thereby were used to purchase common stock at the average market price during the period. In addition to the weighted average number of shares outstanding, the denominator includes the incremental shares obtained through the assumed exercise of the options. The assumption of exercise is not reflected in earnings per share when the exercise price of the options exceeds the average market price of the shares during the period. The share options have a diluting effect only when the average market price of the share during the period exceeds the exercise price of the options.

OPERATING PROFIT

The IAS 1 (Presentation of Financial Statements) standard does not define operating profit. The Group has defined it as follows: Operating profit is the net amount arising from adding other operating income to net sales, deducting cost of sales corrected for changes in inventories and cost of production for own use, deducting costs related to employee benefits, depreciation and possible impairments as well as other operating expenses. Foreign exchange differences and changes in the fair value of derivative financial instruments are included in operating profit in case they originate from operating business items; otherwise they are booked in financial income and expenses.

CASH FLOW STATEMENT

Cash and cash equivalents presented in the cash flow statement comprise cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Cash generated from operating activities has been reported using the indirect method. All income taxes paid during the financial year are presented in net cash generated from operating activities, unless they can be particularly allocated to net cash from (used in) investing or financing activities. Unrealized exchange gains and losses from cash and cash equivalents denominated in foreign currencies and from transactions between Group companies are presented on a separate row before change in cash and cash equivalents, separate from cash generated from (used in) operating, investing and financing activities.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the consolidated financial statements in accordance with IFRS requires management to make certain estimates and assumptions that affect the amounts recognized in the consolidated financial statements and accompanying

notes. Actual results may differ from these estimates. In addition, judgment has to be exercised in applying the accounting principles of the financial statements. Management's estimates and assumptions are based on historical experience and plausible future scenarios, which are continually evaluated. Possible changes in estimates and assumptions are recognized in the accounting period during which estimates and assumptions were fixed and in all subsequent accounting periods.

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next accounting period, are discussed below.

Determining fair value of acquisitions

The fair values of acquired working capital and tangible assets were evaluated by Rapala and external appraisal personnel before the acquisition. The fair value of intellectual property rights (trademarks, patents and technology) and customer relations are established with discounting the related cash flows.

Impairment testing

The carrying amounts of tangible and intangible assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. Goodwill, intangible assets with indefinite useful lives and unfinished tangible assets are in all cases tested annually. For the purposes of assessing impairment, assets are grouped at the lowest cash generating unit level for which there are separately identifiable, mainly independent, cash inflows and outflows. An impairment loss is the amount by which the carrying amount of the assets exceeds the recoverable amount. The recoverable amount is determined by reference to discounted future net cash flows expected to be generated by the asset. These calculations require the use of estimates.

Income taxes

The Group reviews at each balance sheet date especially the carrying amount of deferred tax assets. Deferred taxes are provided using the liability method, as measured with enacted tax rates, to reflect the temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. The main temporary differences arise from the depreciation difference on tangible assets, fair valuation of net assets in acquired companies, intra-group inventory profits, defined benefit pension plans, inventories and other provisions, untaxed reserves and tax losses carried forward. Temporary differences are recognized as a deferred tax asset to the extent that it is probable that future taxable profits will be available, against which the deductible temporary difference can be utilized. The likelihood for the recovery of deferred tax assets from future taxable income is assessed, and to the extent the recovery is not considered likely the deferred asset is adjusted in accordance. At each balance sheet date the Group reviews whether distribution of earnings in subsidiaries is in its control and probable, and books a deferred tax accordingly.

Employee benefits

Pension costs for defined benefit plans are assessed using the projected unit credit actuarial valuation method. Several statistical and other actuarial assumptions are used in calculating the expense and liability related to the plans. These factors include assumptions about the discount rate, future salary increase and annual inflation rate. Statistical information used may differ from actual results. Changes in actuarial assumptions are charged or credited to income over the expected remaining service lives of the employees which could have a slight impact on the Group's income statement.

Share-based payments

The expense of the share-based payments determined at the grant date reflects the Group's estimate of the number of options or share rewards that will ultimately vest. Options are valued at fair value using Black-Scholes option-pricing model. Several assumptions are used in calculating the fair value of the option. These factors include dividend yield, risk free interest rate, expected life of option and personnel forfeit ratio. The non-market criteria are not included in the fair value of the option but taken into account in the number of options that are assumed to vest. On a regular basis the Group reviews the assumptions made and revises its estimates of the share-based payments that are expected to be settled. The changes in the estimates are recognized in the income statement.

Provisions

The timing of the recognition of a provision is based on management's estimate of the moment when the Group has a present legal or constructive obligation, as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

ROUNDING OF FIGURES

All figures in these accounts have been rounded. Consequently the sum of individual figures can deviate from the presented sum figure. Key figures have been calculated using exact figures.

In the financial statements, EUR 0.0 million means the figure is less than EUR 50 000. If the amount is EUR 0, the cell is left empty.

DEFINITION OF KEY FIGURES

| | | | | | |
|---|---|--|-------------------------------------|---|--|
| Operating profit before depreciation and impairments (EBITDA) | = | Operating profit + depreciation and impairments | Dividend/earnings ratio, % | = | $\frac{\text{Dividend for the period} \times 100}{\text{Net profit for the period attributable to the equity holders of the Company}}$ |
| Net interest-bearing debt | = | Total interest-bearing liabilities - total interest-bearing assets | Equity per share, EUR | = | $\frac{\text{Equity attributable to equity holders of the Company}}{\text{Adjusted number of shares at the end of the period}}$ |
| Capital employed | = | Total equity + net interest-bearing liabilities | Effective dividend yield, % | = | $\frac{\text{Dividend per share} \times 100}{\text{Adjusted share price at the end of the period}}$ |
| Working capital | = | Inventories + total non-interest-bearing assets - total non-interest-bearing liabilities | Price/earnings ratio | = | $\frac{\text{Adjusted share price at the end of the period}}{\text{Earnings per share}}$ |
| Total non-interest-bearing assets | = | Total assets - interest-bearing assets - intangible and tangible assets - assets classified as held-for-sale | Average share price, EUR | = | $\frac{\text{EUR amount traded during the period}}{\text{Adjusted number of shares traded during the period}}$ |
| Total non-interest-bearing liabilities | = | Total liabilities - interest-bearing liabilities | Year-end market capitalization, EUR | = | Number of shares at the end of the period x share price at the end of the period |
| Average interest rate on net interest-bearing debt, % | = | $\frac{(\text{Interest paid} - \text{interest received}) \times 100}{\text{Net interest-bearing debt}}$ | Average number of personnel | = | Calculated as average of monthly averages |
| Net interest-bearing debt to EBITDA | = | $\frac{\text{Net interest-bearing debt}}{\text{Operating profit before depreciation and impairments}}$ | | | |
| Return on capital employed (ROCE), % | = | $\frac{\text{Operating profit} \times 100}{\text{Capital employed (average for the period)}}$ | | | |
| Return on equity (ROE), % | = | $\frac{\text{Net profit for the period} \times 100}{\text{Total equity (average for the period)}}$ | | | |
| Debt-to-equity ratio (Gearing), % | = | $\frac{\text{Net interest-bearing liabilities} \times 100}{\text{Total equity}}$ | | | |
| Equity-to-assets ratio, % | = | $\frac{\text{Total equity} \times 100}{\text{Total shareholders' equity and liabilities} - \text{advances received}}$ | | | |
| Earnings per share, EUR | = | $\frac{\text{Net profit for the period attributable to the equity holders of the Company}}{\text{Adjusted weighted average number of shares}}$ | | | |
| Dividend per share, EUR | = | $\frac{\text{Dividend for the period}}{\text{Adjusted number of shares at the end of the period}}$ | | | |

2. SEGMENT INFORMATION

The Group is led as a whole and not organized or managed in segments. For IFRS purposes, segments have though been established for financial reporting in accordance with IFRS 8.

Group's operating segments are Group Fishing Products, Other Group Products and Third Party Products. Group Fishing Products include Group Lures, Fishing Hooks, Fishing Lines and Fishing Accessories.

Other Group Products include Group manufactured and/or branded products for winter sports and some other businesses as well as gift products. Third Party Products include non-Group branded fishing products and third party products for hunting, outdoor and winter sports. Operating segments provide products or services that are subject to risks and returns different from other business segments.

Group's geographical segments (by unit location) provide products or services within a particular economic environment that is subject to risks and returns different from other economic environments.

Group's geographical segments are North America, Nordic countries, Rest of Europe, and Rest of the World.

Pricing of inter-segment transactions is based on market prices.

3. ACQUISITIONS AND DISPOSALS

CORPORATE AND BRAND ACQUISITIONS IN 2009

In 2009, Rapala made the final payment of the minority acquisition of Normark Innovation Inc. (EUR 0.1 million) which was closed in 2007, as well as the second partial payment of the Suffix brand acquisition (EUR 1.1 million) which was closed in 2008. Rapala acquired also the remaining minority of the Norwegian subsidiary Sandelin Berntsen Sport AS (EUR 0.0 million). Sandelin Berntsen Sport AS was merged to Elbe Normark AS in December 2009.

In December 2009, Rapala acquired Ultrabite trademark (EUR 0.9 million) and concluded agreements with Kiotech International PLC (Kiotech) and the Centre for Environment, Fisheries and Aquaculture Science (CEFAS), an executive agency of the UK government's Department for Environment, Food and Rural Affairs, to exclusively commercialize Ultrabite branded and patented pheromone technology to the sport fishing industry and market worldwide. Since 2006, Rapala has been developing new products for worldwide sales exclusively using Ultrabite branded pheromone products developed by CEFAS and licensed through Kiotech. Rapala concluded an exclusive licensing agreement directly with CEFAS for an initial period of 12 years with a further option for 10 years thereafter for the use of pheromone technology. This direct co-operation will be key to the future development and success of this important market sector for a long-term basis.

CORPORATE AND BRAND ACQUISITIONS IN 2008

Rapala increased its ownership in the Finnish cross country ski manufacturer Peltonen Ski Oy from 80% to 90% in January, ownership in the Lithuanian distribution company from 82% to 100% in March and ownership in the distribution company in Thailand from 80% to 100% in September.

In 2008, Rapala made the final payment of the Terminator acquisition (EUR 0.2 million) closed in 2007, the final payment of the Freetime acquisition (EUR 0.1 million) closed in 2005 and a payment of the minority acquisition of Normark Innovation Inc. (EUR 0.1 million) closed in 2007.

These acquisitions did not have an effect on Group's 2008 net sales and net income.

On July, 2008, Rapala and Yao I Co Ltd ("Yao I"), one of the leading manufacturers of fishing line in the world having its offices in Changhua, Taiwan, and fishing line factories in Taiwan and China, concluded an exclusive supply agreement for the supply of fishing lines. In connection with this arrangement, Yao I sold its Suffix brand, including all intangible assets relating to Suffix branded and other fishing line business (excluding manufacturing related), to Rapala. The consideration for the Suffix brand, including all intangible assets relating to Suffix branded and other fishing line business, is USD 10 million and will be paid over the next seven years. In addition, Rapala paid USD 1.7 million for Suffix fishing line inventories in the USA.

BUSINESS ACQUISITIONS

| EUR million | Note | 2009 | | 2008 | |
|---|------|-------------|-------------------------|------------|-------------------------|
| | | Fair value | Seller's carrying value | Fair value | Seller's carrying value |
| Minority interest | | 0.0 | | 0.1 | |
| Fair value of acquired net assets | | 0.0 | | 0.1 | |
| | | | | | |
| | | 2009 | 2008 | | |
| Cash paid | | 0.0 | 0.1 | | |
| Cash paid later | | | 0.0 | | |
| Total purchase consideration | | 0.0 | 0.2 | | |
| | | | | | |
| Excess of Group's interest in the net fair value of acquired net assets over cost | | 0.0 | 0.0 | | |
| Goodwill | 13 | 0.0 | 0.0 | | |
| Net | | 0.1 | 0.0 | | |
| | | | | | |
| Cash paid ¹⁾ | | 0.1 | 0.4 | | |
| Cash and cash equivalents acquired | | | | | |
| Net cash flow | | 0.1 | 0.4 | | |

1) Cash paid in 2009 includes the final payment of the minority acquisition of Normark Innovation Inc. (EUR 0.1 million) and the minority acquisition of the Norwegian subsidiary Sandelin Berntsen Sport AS (EUR 0.0 million). Cash paid in 2008 includes a final payment of the Terminator acquisition (EUR 0.2 million), a final payment of the Freetime acquisition (EUR 0.1 million) and a payment of the minority acquisition of Normark Innovation Inc. (EUR 0.1 million).

Acquired companies are accounted for using the purchase method of accounting, which involves allocating the cost of the business combination to the fair value of the assets acquired and liabilities and contingent liabilities assumed at the date of acquisition.

The fair value of acquired intellectual property rights is established with the estimated discounted royalty payments. Determination of fair value is the market based estimated royalty rate (normalized net cash flow), that an external party would be willing to pay for the license contract. The fair value of customer relations is established based on the estimated duration of customer relationship (average minimum duration) and discounted net cash flows of present customer relationships.

The goodwill increase in 2009 (EUR 0.0 million) arose from the minority acquisition of the Norwegian subsidiary Sandelin Berntsen Sport AS. The goodwill increase in 2008 (EUR 0.0 million) was a combination of several small acquisitions and because it was not significant, the goodwill has not been justified. The goodwill has been tested for impairment. For more details on the impairment testing of goodwill, see note 13.

4. OTHER OPERATING INCOME

| EUR million | 2009 | 2008 |
|---|------|------|
| Sale of French warehouse and office buildings | | 1.4 |
| Sale of Hong Kong office premises | 0.5 | |
| Insurance compensations | 0.1 | 0.1 |
| Rental income | 0.1 | 0.2 |
| Scrap sales | 0.0 | 0.2 |
| Other gains from sale of intangible and tangible assets | 0.3 | 0.1 |
| Government grants | 0.1 | 0.2 |
| Royalty income | 0.1 | 0.1 |
| Other income | 0.0 | 0.8 |
| Total | 1.2 | 3.1 |

Other income, EUR 0.0 million (2008: 0.8 EUR million) is a combination of several smaller income items, of which none is individually significant.

5. OTHER OPERATING EXPENSES

| EUR million | 2009 | 2008 |
|---|-------|-------|
| Selling and marketing expenses | -10.3 | -11.3 |
| Freight | -4.4 | -4.9 |

| Share-based payments to be settled in cash | -0.2 | 0.3 |
| Other personnel expenses | -6.6 | -7.4 |
| Total | -53.8 | -57.5 |

The employee benefit expenses in 2009 include EUR 0.3 million employee related restructuring expenses. For more details on employee benefits for top management and option programs, see notes 28 and 29.

AVERAGE PERSONNEL

| Persons | 2009 | 2008 |
|-------------------|-------|-------|
| North America | 115 | 115 |
| Nordic | 434 | 456 |
| Rest of Europe | 717 | 804 |
| Rest of the World | 993 | 2 768 |
| Total | 2 259 | 4 143 |

8. DEPRECIATION, AMORTIZATION AND IMPAIRMENTS

| EUR million | 2009 | 2008 |
|---|------|------|
| Amortization and impairment of intangible assets | | |
| Amortization of customer relations | -0.2 | -0.2 |
| Amortization of other intangible assets | -0.2 | -0.2 |
| Excess of Group's interest in the net fair value of acquired net assets over cost | | 0.0 |
| Impairment losses of trademarks | -0.1 | |
| Depreciation and impairment of tangible assets | | |
| Depreciation of buildings | -0.7 | -0.9 |
| Depreciation of machinery and equipment | -3.5 | -3.7 |
| Depreciation of other tangible assets | -1.1 | -1.2 |
| Impairment losses of other tangible assets | -0.9 | |
| Total | -6.9 | -6.2 |

In 2009, the impairments of intangible and tangible assets were related to the restructuring of the Group's Hungarian distribution company and the reorganization of the Chinese manufacturing operations.

9. RESEARCH AND DEVELOPMENT EXPENSES

Net profit for the period includes research and development expenses of EUR 2.0 million recognized as an expense in 2009 (2008: EUR 1.8 million). Group has not capitalized research and development costs.

10. FINANCIAL INCOME AND EXPENSES

| EUR million | 2009 | 2008 |
|--|------|------|
| Foreign exchange gains | | |
| From loans and receivables | 2.9 | 2.3 |
| From financial liabilities measured at amortized cost | 3.2 | 3.6 |
| Foreign exchange losses | | |
| From loans and receivables | -3.2 | -2.5 |
| From financial liabilities measured at amortized cost | -1.4 | -3.0 |
| Interest and other financial income | | |
| Interest income from loans and receivables | 0.2 | 0.7 |
| Other financial income | 0.1 | 0.0 |
| Interest and other financial expenses | | |
| Interest expense on financial liabilities measured at amortized cost | -3.8 | -5.8 |
| Other financial expenses | -0.2 | -0.2 |
| Total | -2.1 | -4.8 |

Interest expenses include interest expense of finance lease contracts of EUR -0.0 million in 2009 (2008: EUR -0.1 million).

RECOGNIZED IN THE STATEMENT OF OTHER COMPREHENSIVE INCOME

| EUR million | 2009 | 2008 |
|---|------|------|
| Change in fair value of interest rate derivatives - hedge accounted, net of tax | -0.1 | -0.2 |
| Gains and losses on hedges of net investments, net of tax | 0.2 | -2.8 |
| Fair value changes on available-for-sale investments, net of tax | | -0.1 |
| Total | 0.1 | -3.1 |

In 2009 and 2008, hedges of net investments and interest rate derivatives, which fulfill IAS 39 effectiveness requirements, had no income statement effect.

| Depreciation difference and other untaxed reserves | 1.8 | 0.0 | | 0.0 | 1.9 |
| Inventory | 1.7 | 0.2 | | 0.2 | 2.0 |
| Fair value adjustments for acquired net assets | 1.6 | -0.3 | | 0.0 | 1.4 |
| Other temporary differences | 0.1 | 0.3 | 0.0 | -0.1 | 0.3 |
| Deferred tax liabilities | 5.3 | 0.2 | 0.0 | 0.2 | 5.6 |
| Net deferred tax asset | 2.7 | -0.8 | 0.1 | -0.2 | 1.9 |

Deferred taxes have been reported as a net balance according to IAS 12. As of December 31, 2009, the Group had tax losses carried forward of EUR 6.6 million (2008: EUR 4.9 million), for which deferred tax assets have not been recognized in the consolidated financial statements because the realization of the tax benefit is not probable. EUR 3.9 million of these tax losses will expire during the next five years (2008: EUR 2.3 million).

Deferred tax liability on undistributed earnings of subsidiaries has not been recognized in the consolidated balance sheet because distribution of the earnings

is in the control of the Group and such distribution is not probable within the foreseeable future.

The consolidated balance sheet includes deferred tax assets of EUR 1.6 million (2008: EUR 1.6 million) in subsidiaries, which have generated losses in financial year 2009 or 2008. The recognition of these assets is based on result estimates, which indicate that the realization of these deferred tax assets is probable.

12. TANGIBLE ASSETS AND ASSETS HELD-FOR-SALE

| 2009 EUR million | Land | Buildings | Machinery and equipment | Other tangible assets | Advance payments and construction in progress | Total |

| Carrying value Dec. 31 | 10.5 | 1.4 | 43.8 | 1.9 | 57.6 |

1) Includes reclassifications between intangible and tangible assets.

2) More information on acquisition of Ultrabrite trademark in the note 3.

Other intangible assets include patents, licenses and computer software. Intangible assets are stated at cost, amortized on a straight line method over expected useful lives which vary from 3 to 15 years and adjusted for any impairment charges. The expected useful life for most trademarks is decades and therefore these intangibles are measured at cost less any accumulated impairment loss and not amortized. Goodwill is measured at cost less any accumulated impairment loss, and not amortized. Trademarks with indefinite lives and goodwill are tested for impairment annually.

GOODWILL AND TRADEMARKS WITH INDEFINITE LIVES BY BUSINESS SEGMENTS

| EUR million | Group Fishing Products | Other Group Products | Third Party Products | Total |
|----------------------------------|------------------------|----------------------|----------------------|-------|
| 2009 | | | | |
| Goodwill | 40.5 | 1.1 | 2.1 | 43.7 |
| Trademarks with indefinite lives | 10.8 | 0.0 | 0.5 | 11.3 |
| 2008 | | | | |
| Goodwill | 40.7 | 1.1 | 2.0 | 43.8 |
| Trademarks with indefinite lives | 10.1 | 0.1 | 0.4 | 10.5 |

IMPAIRMENT TESTING OF GOODWILL AND TRADEMARKS WITH INDEFINITE LIVES

The Group is led as a whole and not organized nor managed in segments. Most of the units are also strongly interlinked i.e. some units do not have a sales or a production organization or some other functions or operations needed to operate on a stand-alone basis. However, according to IFRS, the lowest cash-generating unit (CGU) cannot be larger than an operating segment in the Group's segment reporting. As a consequence, goodwill and trademarks with indefinite lives are tested on the operating segment level.

The recoverable amount of the CGU is determined based on value-in-use calculations. Cash flow projections, which were used in these calculations, were based on most recent 5-year financial forecasts prepared by the management and approved by the Board. The estimated sales and production volumes are derived from the utilization of existing property, plant and equipment. The most important assumptions on which management has based its cash flow projections are the sales and gross margins. Discount rate is the weighted average pre-tax cost of capital (WACC), which was 5.0% in 2008 and 2009. In the impairment tests prepared in 2008 and 2009, the growth rate used to extrapolate the cash flow beyond the five-year period is 0%. As a result of the performed impairment tests, no impairment losses have been recognized in 2008 or 2009.

Key assumptions

Sales – The Group's estimated sales are based on present and future product assortment and utilization of distribution and manufacturing capacity. In addition, estimated sales are based on long-term growth of industry and further implementation of Group's strategic objectives.

EBITDA margin – The Group's estimated EBITDA margin, operating profit before depreciation and impairments compared to net sales, is based on past years actual margins and management's view on sales and gross margin development. The increase in general cost level has also been taken into account in the development of EBITDA margin.

Discount rate – Discount rate is the weighted average pre-tax cost of capital (WACC). Weighted average cost of capital represents the total cost of Group's equity and debt taken into account their different return requirements. The WACC has been determined using the Group's actual cost of debt as the basis for the cost of debt but adding the estimated premium that would be added if the loan portfolio was refinanced now, and for cost of equity, the fact that the risk factor of the Group's equity is markedly lower than the average risk level in the Finnish stock market.

Growth rate – Compared to actual growth rates during past 5 years, management has been conservative in determining the growth rate for impairment purposes.

Sensitivity analysis

The key sensitivity factors for the impairment test are the estimated EBITDA margin and the discount rate. It is the management's opinion that no probable change in any of the key sensitivity factors would lead to a situation where the carrying amount would exceed the recoverable amount. Even if EBITDA margin would be 25% lower or the discount rate 5 percentage points higher than used in the management's estimates, it would not lead to an impairment loss in Group Fishing Products and Other Group Products. In Third Party Products, the sensitivity level is only some half of the others due to the high level of working capital at the end of the financial year.

14. INVESTMENTS IN ASSOCIATED COMPANIES

The Group has a 33.3% interest in unlisted Lanimo Oü. Its main activity is producing leather-haberdashery. The carrying amount of Lanimo Oü does not include goodwill or impairments. Lanimo Oü's figures are based on the information for the financial period ending on September 30, due to differences in reporting time schedule. Information for the financial period ending on December 31, 2008 is the following: assets EUR 0.1 million, liabilities EUR 0.1 million, sales EUR 0.2 million and loss EUR 0.0 million.

| EUR million | 2009 | 2008 |
|--------------------------|------|------|
| Acquisition cost Jan. 1 | 0.0 | 0.0 |
| Increase | | 0.0 |
| Decrease | 0.0 | |
| Acquisition cost Dec. 31 | 0.0 | 0.0 |

INFORMATION ON LANIMO OÜ

| Milj. EUR | Domicile | Assets | Liabilities | Sales | Profit/loss | Ownership,% |
|-----------|----------|--------|-------------|-------|-------------|-------------|
| 2009 | Estonia | 0.1 | 0.1 | 0.2 | 0.0 | 33.3 |
| 2008 | Estonia | 0.1 | 0.1 | 0.2 | 0.0 | 33.3 |

15. AVAILABLE-FOR-SALE FINANCIAL ASSETS

| EUR million | 2009 | 2008 |
|-------------------------|------|------|
| Carrying value Jan. 1 | 0.5 | 0.6 |
| Additions | 0.0 | |
| Fair value changes | | -0.1 |
| Disposals | -0.2 | |
| Translation differences | 0.0 | 0.0 |
| Carrying value Dec. 31 | 0.3 | 0.5 |

Available-for-sale financial assets comprise of unlisted shares that are measured at fair value. Certain unlisted shares for which fair values cannot be measured reliably are measured at cost less possible impairment. The fair value changes of available-for-sale financial assets, net of tax, are recognized in shareholders' equity. BRF Morkullan real estate in Sweden was sold in 2009. As Oy Tahkon Eagle is the most significant available-for-sale financial asset.

16. INVENTORIES

| EUR million | 2009 | 2008 |
|---------------------------------|------|------|

| Current receivables | | |
| Interest-bearing | | |
| Loan receivables | 0.1 | 0.0 |
| Derivatives | 0.1 | 0.3 |
| Other receivables | | 0.0 |
| Non-interest-bearing | | |
| Trade receivables | 41.4 | 44.9 |
| VAT receivable | 0.8 | 1.4 |
| Prepaid insurance expenses | 0.1 | 0.2 |
| Other prepaid expenses and accrued income | 1.4 | 1.7 |
| Other receivables | 0.7 | 2.3 |
| Valuation allowance for trade receivables | -2.5 | -2.3 |
| Total | 42.5 | 48.6 |

Due to their short maturity, the fair value of current receivables is regarded as corresponding to their original carrying amount.

The weighted average interest rate of non-current loan receivables was 2.44%. The weighted average interest rate of current loan receivables at December 31, 2009 was 1.66% (2008: 7.98%).

Other current interest-bearing receivables include interest receivables and deposits with maturities of over three months.

ALLOWANCE FOR TRADE RECEIVABLES

| EUR million | 2009 | 2008 |
|---|------|------|
| Allowance for trade receivables Jan. 1 | 2.3 | 1.8 |
| Additions | 0.8 | 1.0 |
| Deductions | -0.6 | -0.3 |
| Recovery | 0.0 | 0.0 |
| Translation differences | 0.0 | -0.1 |
| Allowance for trade receivables Dec. 31 | 2.5 | 2.3 |

In most cases allowances are determined individually, when there is objective evidence (such as significant overdue of receivables and unsuccessful dunning attempts or known financial difficulties and thus increased probability of customer insolvency) that the Group will not be able to collect all amounts due according to the original terms of the receivables. Allowances have not been made on other receivables.

18. CASH AND CASH EQUIVALENTS

| EUR million | 2009 | 2008 |
|--------------------------|------|------|
| Cash at bank and in hand | 27.4 | 28.7 |
| Short-term deposits | 1.6 | 1.9 |
| Total | 29.0 | 30.6 |

Cash and cash equivalents comprise cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Bank overdrafts are included within borrowings in current interest-bearing loans.

Fair value of cash and cash equivalents does not differ significantly from the carrying value.

19. EQUITY ATTRIBUTABLE TO SHAREHOLDERS

| EUR million | 2009 | 2008 |
|--|------|------|
| Share capital Jan. 1 | 3.6 | 3.6 |
| Share capital Dec. 31 | 3.6 | 3.6 |
| Share premium fund Jan. 1 | 16.7 | 16.7 |
| Share premium fund Dec. 31 | 16.7 | 16.7 |
| Fair value reserve Jan. 1 | -0.3 | 0.0 |
| Gains and losses on cash flow hedges, net of tax | -0.1 | -0.2 |
| Fair value changes on available-for-sale investments, net of tax | | -0.1 |
| Fair value reserve Dec. 31 | -0.3 | -0.3 |
| Fund for invested non-restricted equity Jan. 1 | 4.9 | 4.9 |
| Fund for invested non-restricted equity Dec. 31 | 4.9 | 4.9 |
| Own shares Jan. 1 | -0.9 | |
| Purchase of own shares | -0.6 | -0.9 |
| Own shares Dec. 31 | -1.4 | -0.9 |
| Retained earnings Jan. 1 | 77.7 | 70.9 |
| Translation differences | 1.3 | -1.2 |
| Gains and losses on hedges of net investments, net of tax | 0.2 | -2.8 |
| Dividends paid | -7.5 | -6.9 |
| Share-based payments | 0.1 | 0.1 |
| Other changes | 0.0 | 0.0 |
| Net income for the period | 12.1 | 17.7 |
| Retained earnings Dec. 31 | 84.0 | 77.7 |

In those cases where option rights were granted during the period when the old Finnish Companies Act (September 29, 1978/734) was in force, the proceeds received for option-based share subscriptions, net of any transaction costs, have been credited to share capital (nominal value) and share premium fund. The fund for invested non-restricted equity includes other investments of equity nature and subscription prices for shares to the extent that it is specifically not to be credited to share capital. The payments received for share subscriptions based on the options granted after the entry into force (September 1, 2006) of the new Finnish Companies Act (21 July 2006/624) are fully recognized in the fund for invested non-restricted equity. The Group has not decided on any option programs since the new Finnish Companies Act came into effect.

Translation differences contain exchange differences arising from the currency translation of foreign subsidiaries' financial statements and exchange differences arising from a monetary item that forms part of a net investment in a foreign company. Translation differences also contain fair value changes from

hedging the net investment in foreign companies where this meets the conditions for hedge accounting. Fair value reserve includes movements in the fair values of available-for-sale financial assets and derivative instruments used for cash flow hedging. Own shares acquired by the Group, including directly attributable costs, are presented as a deduction from the total equity in the consolidated financial statements.

DIVIDENDS

For more details on dividends, see note 31.

SHARES AND SHARE CAPITAL

On December 31, 2009, the share capital fully paid and reported in the Trade Register was EUR 3.6 million and the total number of shares was 39 468 499 (2008: 39 468 449). The book value of a share is EUR 0.09.

OWN SHARES

On April 23, 2008 the Board decided to start buying back own shares in accordance with the authorization granted by the Annual General Meeting on April 3, 2008. At December 31, 2008 Rapala held 212 665 of its own shares, representing 0.5% of the total number and the total voting rights of Rapala shares. The average price for the repurchased own shares was EUR 4.01 in 2008.

Based on the decision of the Annual General Meeting on April 3, 2008, the Board continued to repurchase own shares in early 2009. Based on the decision of the Annual General Meeting on April 7, 2009, the repurchase of own shares continued until the end of year. At the end of December 2009, Rapala held 340 344 own shares, representing 0.9% of the total number and the total voting rights of Rapala shares. The average price for the repurchased own shares was EUR 4.31 in 2009.

CHANGES IN SHARE CAPITAL IN 2008–2009

There were no changes in the share capital in 2008 and 2009.

BOARD'S AUTHORIZATIONS

Based on authorization given by the Annual General Meeting (AGM) in April 2007, the Board can decide to issue shares through issuance of shares, options or special rights entitling to shares in one or more issues. The number of new shares to be issued including the shares to be obtained under options or special rights shall be no more than 10 000 000 shares. This authorization includes the right for the Board to resolve on all terms and conditions of the issuance of new shares, options and special rights entitling to shares, including issuance in deviation from the shareholders' preemptive rights. This authorization is in force for a period of 5 years from the resolution by the AGM.

The Board is also authorized to resolve to repurchase a maximum of 2 000 000 shares by using funds in the unrestricted equity. This amount of shares corresponds to less than 10% of all shares of the company. The shares will be repurchased through public trading arranged by NASDAQ OMX Helsinki at the market price of the acquisition date. The shares will be acquired and paid in pursuance of the rules of NASDAQ OMX Helsinki and applicable rules regarding the

payment period and other terms of the payment. This authorization is effective until the end of the next AGM.

SHARE BASED PAYMENTS

For more details on share based payments, see note 29.

20. EMPLOYEE BENEFIT OBLIGATIONS

Most of the Group's pension plans are defined contribution plans. The Group has defined benefit pension plans only in France and Sweden. In France, the retirement benefits are determined based on salary and period of employment. These French obligations are unfunded. In Sweden, the ITP-pension plans operated by Alecta are multi-employer defined benefit pension plans. Because it has not been possible to get sufficient information for the calculation of obligations and assets by employer from plan operations, and because these Swedish plans are not significant for the Group, they have been treated as defined contribution plans in the financial statements. In 2008, there was a defined benefit plan also in Canada where the supplementary pension arrangement for the CEO of the Group's Canadian subsidiary was classified as a funded defined benefit plan. The Group has no other post-employment benefit obligations. The pension security of the personnel of the Group's Finnish companies is arranged under the Finnish statutory employee pension plan (TYEL) through an external pension insurance company. Employee benefit obligations also include a long-term profit-sharing payable to the employees in France.

EXPENSES RECOGNIZED IN THE INCOME STATEMENT

| EUR million | 2009 | 2008 |
|---|------|------|

| Total provisions | 0.1 | 0.2 |

Other provisions include distinct provisions, which are not significant individually. Short-term provisions are expected to realize within the next 12 months, and the long-term provisions are expected to realize during a longer period.

22. FINANCIAL RISK MANAGEMENT AND DERIVATIVE FINANCIAL INSTRUMENTS

The main objective of the Group's financial risk management is to reduce the impacts of price fluctuations in financial markets and other factors of uncertainty on earnings, cash flows and balance sheet, as well as to ensure sufficient liquidity. The Board has approved the Group's risk management principles and CEO is responsible, together with the Group's finance management, for development and implementation of financial risk management procedures.

In 2009, the Group continued to develop its risk management processes. Group Risk Management, consisting of the CFO, Group Treasurer and Group Risk Manager, review financial risks on regular basis to manage Group's financial risk position and decide on necessary actions to manage financial risks. The global turbulence in the world economy and financial markets continued in 2009 and consequently the significance of continuous monitoring and management of e.g. foreign exchange-, interest-, liquidity- and counterparties' solvency risks was further emphasized.

Financial risks consist of market risks, credit and default risks and liquidity risks. This note also presents the Group's capital management.

MARKET RISKS

The Group's market risks are mainly caused by changes in foreign exchange and interest rates. These changes may have a significant impact on the Group's earnings, cash flows and balance sheet. The Group is also exposed to market price changes of certain raw materials, mainly metals and plastics, which are priced on commodity markets.

1. Foreign exchange risk

Major part of the Group's sales is in euros and US dollars. Also a significant part of expenses arise in euros, US dollars as well as HK dollars and Chinese yuans (renminbi). Group Risk Management monitors regularly the balance between Group's foreign currency sales and expenses as well as the development of the key currencies. Income and expenses within different currencies net each other

out to some extent, creating an effective natural hedge in this respect. The Group's principle is not to hedge systematically all transactions or open positions, but to apply hedging dynamically based on the prevailing market situation and concentrate on the income statement impact of the most relevant currencies, especially US dollar.

In order to mitigate adverse impacts of foreign exchange movements on sales and purchases as well as forecasted cash flows and firm commitments, the Group uses derivative instruments. Derivative instruments are in most cases short term and with aim to hedge some proportion of the next season's foreign currency nominated sales or purchases. Instruments used may consist of foreign currency forward contracts, option contracts or combination instruments. Business units do most of their currency hedging against the Group's parent company. Group Risk Management monitors the Group's consolidated risk position and exercises external derivative instruments in line with general guidance and instructions set by the Board and CEO.

Group does not apply IAS 39 (hedge accounting) for the currency derivatives made to fix exchange rates of sales and purchases, but the derivatives are used for the purpose of reducing adverse impacts of market price changes on net earnings and cash flows related to business and financing activities. All derivatives are initially recognized at fair value on the date the derivative contract is entered into, and are subsequently remeasured at fair value on each balance sheet date. The underlying hedged foreign currency denominated transaction will however take place at a later date. As IAS 39 (hedge accounting) is not applied, these derivatives cause timing differences between the Group's exchange gains/losses and sales/purchases.

Currently, all currency derivatives used by the Group are short-term zero cost option pair instruments to which IAS 39 (hedge accounting) is not applied. The fair values of the option pairs are received from the bank and are determined based on fair value calculations using the Black and Scholes –model. All changes in fair value of currency derivatives are recognized in the income statement. In 2009, currency derivatives had an income statement effect of EUR 0.4 million (2008: EUR 0.1 million). Fair values of currency derivatives are summarized under section 4. Derivatives.

As a result of sales and purchases in foreign currencies as well as operations in several jurisdictions, Group has foreign currency denominated receivables and payables. These are revalued at each balance sheet date and consequently exposed to foreign exchange rate movements. Depending on whether foreign currency monetary receivables and payables relate to sales and purchases or financial items, the foreign exchange gains/losses are booked in the income statement either above or below operating profit.

Group Risk Management regularly monitors the balance between foreign currency denominated monetary receivables and payables and takes actions to increase or decrease the hedge if necessary and financially feasible.

The Group has its external loan payable portfolio in several foreign currencies and it aims to use them to partially hedge loans and accounts receivable as well as net income in these foreign currencies. However, the foreign exchange impact on these does not always meet in the same section of the income statement. The purpose of this hedging is though to reduce the adverse impact of currency movements on the Group's net income and equity.

The Group has net investments in subsidiaries whose equity is in foreign currency and thus exposed to foreign exchange rate movements when translated into euro. In 2009, the Group continued to partially hedge its net investments in USD, AUD, JPY and NOK currency denominated foreign subsidiaries using equivalent currency loans payable. Hedging relationships are treated according to IAS 39 as effective hedges of a net investment in a foreign subsidiary, which means that the effective portion of foreign exchange effect on these loans is recorded directly in equity. The total non-euro-denominated equity of the Group's foreign subsidiaries was EUR 100.8 million on December 31, 2009 (2008: EUR 86.2 million), of which 18.4% was on Dec. 31 subject to equity hedging. If the currencies that are linked to euro based on ERM II (DKK, EEK, LTL and LVL) were excluded, hedge rate would be 23.4%.

The most relevant non-euro-denominated equities not subject to equity hedging are in HKD-, EEK- and CAD-currencies.

Group Risk Management monitors regularly the amounts of foreign exchange nominated net investments and decides on equity hedging actions accordingly.

Hedging of net investments in foreign subsidiaries

| | 2009 | | | | | | 2008 | | | | | |
|--------------------------|---|---|------------------------------------|--------------------------------------|----------------|--|---|---|------------------------------------|--------------------------------------|----------------|--|

Exposure to foreign exchange risk from transactions

Foreign currency exposure in companies whose reporting currency is other than the currency under analysis. The connections possibly prevailing between different currencies are not taken into account, e.g. US dollar and Hong Kong dollar are considered as separate currencies in this analysis. Balance sheet items include both Group's external and internal items. Income statement items do not include internal items to the extent reported currency is foreign currency for both transaction parties and hence does not expose the Group to foreign exchange risk. The positions of other currencies are smaller.

| EUR million | 2009 | | | 2008 | | |
|---|-------|-------|-------|-------|-------|-------|
| | USD | CNY | EUR | USD | CNY | EUR |

1) Excluding loans used for hedging net investments in foreign subsidiaries

2) Currency derivatives are used to hedge a portion of purchases in foreign currency.

Sensitivity analysis

The effect of a 10% weakening of USD, HKD, CNY, AUD, NOK, CAD, SEK and RUB (against euro) in euro based on the following assumptions and factors:

- The sensitivity analysis is based on change of value in a single analyzed currency and assumes other variables (including values of other currencies) to remain unchanged. The connections possibly prevailing between some currencies are not taken into account.
- The sensitivity is analyzed against income statement and balance sheet conversion rates prevailing at Dec. 31.
- The analysis includes the effect of income statement transactions made in the analyzed currency between Jan. 1 and Dec. 31 in Group companies, whose reporting currency is other than the analyzed currency (so called transaction impact) as well as in Group companies, whose reporting currency equals to the analyzed currency (so called translation impact). The analysis takes into account the currency forward contracts in place at Dec. 31. The sensitivity analysis of income statement transactions excludes Group's internal items as these net out.
- The sensitivity analysis includes the effect of valuation of the most significant financial assets and liabilities included in the balance sheet as per Dec. 31 in companies whose reporting currency is other than the analyzed currency. The balance sheet items include both Group's external and internal items. Hedging of net investments as per Dec. 31 is taken into account in the analysis of the balance sheet items.
- The sensitivity analysis includes the effect of the translation of subsidiaries' equity as per Dec. 31 in subsidiaries, whose reporting currency equals to the analyzed currency, taking into account the hedging of the net investment as per Dec. 31.
- The tax effect included in the sensitivity analysis is calculated by using the Group's total effective tax rate. Translation differences in equity do not include any tax effect.
- Comparative figures have been specified by taking into account the effect of tax and cash and cash equivalents.
- On average, the effect of other currencies is smaller than in the ones analyzed here.

| EUR million | 2009 | | | | | | | | 2008 | | | | | | | |
|-----------------------------------|------|------|-----|------|------|------|------|------|------|------|-----|------|------|------|------|------|
| | USD | HKD | CNY | AUD | NOK | CAD | SEK | RUB | USD | HKD | CNY | AUD | NOK | CAD | SEK | RUB |
| Operating profit | -0.8 | 0.5 | 1.8 | -0.3 | -0.7 | -0.7 | -0.7 | -1.7 | 0.6 | 0.7 | 1.9 | -0.5 | -0.7 | -0.7 | -0.5 | -1.9 |
| Net income (net of tax) | -0.6 | 0.4 | 1.2 | -0.4 | -0.9 | -0.5 | -0.6 | -1.2 | 1.5 | 0.6 | 1.3 | -0.4 | -0.5 | -0.5 | -0.4 | -1.3 |
| Equity (net of tax) ³⁾ | -1.1 | -1.6 | 0.0 | -0.3 | -0.1 | -1.0 | -0.3 | -0.5 | -2.0 | -1.7 | 0.0 | -0.2 | -0.1 | -0.9 | -0.3 | -0.5 |

3) Without the effect of net income.

A 10% strengthening would have the equal but opposite effect with exception of USD, where 10% strengthening would have EUR 0.0 million smaller opposite effect on operating profit and net income than stated above as a result of used hedging instruments.

2. Interest rate risk

The Group has interest-bearing borrowings and interest rate swaps, where the interest is variable and connected to market rates. Consequently the Group is exposed to changes in market interest rates.

| EUR million | 2009 | | 2008 | |
|---|-------------|---------|-------------|---------|
| | Non-current | Current | Non-current | Current |
| Loans from financial institutions with fixed interest rate | 0.1 | 0.1 | 0.1 | 0.2 |
| Pension loan with fixed interest rate | 8.2 | 3.8 | 4.0 | 1.0 |
| Loans from financial institutions with variable interest rate | 27.2 | 49.8 | 38.3 | 72.7 |
| Commercial paper program with variable interest rate | | 19.0 | | 4.0 |

The Group's borrowings are mainly in euros and US dollars, which have a substantial contribution to the overall interest rate risk. The Group's borrowings are almost fully flowing through the Group's parent company, which is consequently managing the Group's overall interest rate risk. The Group's interest rate risk is monitored as cash flow and fair value risks. Group Risk Management analyzes regularly the interest rate risk and agree on actions if needed. These actions may include changing the currency split of the external loan portfolio, selection between different sources of loan financing, changing the interest rate periods as well as entering into derivative financial instruments available to manage the interest rate risk. The Group does not have a fixed policy on how interest rates are fixed to different time periods, but this is decided based on prevailing market conditions.

Most of the Group's interest-bearing liabilities have an interest period of less than one year. In order to manage the interest rate risk and to take benefit of favorable interest rate levels, EUR 12.2 million of the Group's loans payable is connected to fixed interests or interest periods of 12-month or longer. In 2008, the interest risk was further spread by taking a pension loan with a five year's fixed interest rate.

The interest rate risk may also be managed by using interest rate swaps, where the Group pays a fixed rate and receives variable rate. Spreading of the interest rate risk was further continued in 2009 by entering into new interest rate swaps for years 2009-2013. As of Dec. 31 the Group had 14 interest rate swaps, of which 13 are designated and effective as a cash flow hedge in accordance with IAS 39. The market price based fair value of interest rate derivatives are received from the bank. In 2009, interest rate derivatives had EUR 0.0 million (2008: EUR 0.0 million) income statement effect and an equity effect of EUR -0.1 million (2008: EUR -0.3 million). Fair values of interest rate derivatives are summarized under section 4. Derivatives.

Sensitivity analysis

The effect of liabilities with variable interest rate and interest rate swap on net income and equity if there was a 1% increase in interest rates. The sensitivity analysis is based on following assumptions and factors:

- All other variables, in particular foreign exchange rates, are assumed to remain unchanged.
 - The sensitivity is analyzed against interest rates applicable on Dec. 31.
 - The sensitivity analysis includes the liabilities and interest rate swaps with variable interest rate in force on Dec. 31.
 - The sensitivity analysis of interest rate swaps is based on calculations received from the bank.
 - The tax effect included in the sensitivity analysis is calculated by using the Group's total effective tax rate.
- Also the comparative figures have been specified by taking into account the effect of tax.

| EUR million | 2009 | | 2008 | |
|---|----------------------------|--------------------------------------|----------------------------|--------------------------------------|
| | Net income (net of tax) | Equity (net of tax) ⁴⁾ | Net income (net of tax) | Equity (net of tax) ⁴⁾ |
| Loans from financial institutions with variable interest rate | -0.6 | 1.2 | -0.8 | 0.1 |
| Commercial paper program with variable interest rate | -0.1 | | 0.0 | |

4) Without the effect of net income.

3. Other market price risks

The Group purchases some raw-materials, which are priced on regulated markets. These include commodity metals such as copper, zinc and lead, and some plastics. The value of these purchases is still relatively low and market price risk management actions are done in each manufacturing unit locally. Group Risk Management also monitors the development of these raw-material prices. No commodity hedging is currently carried out, but this alternative was investigated during 2008.

The Group does not own any such publicly traded shares or securities which would be subject to market price risks. The Group's investments in available-for-sale financial instruments are insignificant and consist of real estate investments and other unlisted shares for which no clear market price exists.

4. Derivatives

| EUR million | 2009 | | | 2008 | | |
|----------------------|---------------------------------|---------------------------|-------|---------------------------------|---------------------------|-------|
| | Foreign currency forwards | Interest rate swaps | Total | Foreign currency forwards | Interest rate swaps | Total |
| Nominal amount | 7.1 | 98.0 | 105.0 | 7.2 | 14.1 | 21.3 |
| Positive fair values | 0.1 | 0.0 | 0.2 | 0.3 | 0.0 | 0.3 |
| Negative fair values | | 0.5 | 0.5 | | 0.4 | 0.4 |
| Net fair values | 0.1 | -0.5 | -0.3 | 0.3 | -0.4 | -0.1 |

All foreign currency forwards mature within the next 12 months. Interest rate swaps, which are effective and mature between 2010 and 2013, generate following non-discounted cash flows, calculated based on interest rates and foreign exchange rates prevailing as per Dec. 31: EUR -1.0 million during year 2010, EUR -1.0 million during year 2011, EUR -1.3 million during year 2012 and EUR -1.1 million during year 2013.

LIQUIDITY RISK

Generally, the seasonality of the Group's cash flow is fairly predictable and Group's finance management monitors Group's liquidity position using the cash pooling system as well as monthly cash flow and liquidity reporting.

Group's finance management raises most of the Group's interest-bearing debt centrally. The Group seeks to reduce liquidity and refinancing risks with balanced maturity profile of loans as well as by keeping sufficient amount of credit lines available. As from 2007, the flexibility of the Group's liquidity management has been increased with a EUR 25.0 million domestic commercial paper program, which together with Group's credit limits is utilized to balance the seasonality of the Group's cash flow. The size and maturity of issued commercial papers is decided by the CFO and Group Treasurer, based on forecasted cash flows, status of commercial paper markets and applicable interest rates. The renewal of commercial papers upon maturity creates certain liquidity risk, which is managed by maintaining sufficient other liquidity reserves available at the maturity dates.

In year 2009, the uncertainties in the financial markets continued and this had impacts also on the domestic commercial paper markets disturbing the sales of the Group's commercial papers from time to time. Compared to year 2008 the situation developed towards positive direction as a result of improving market conditions and wider distribution channel of the Group's commercial papers.

In year 2009 the Group continued to utilize the possibility of pension contribution relending in order to increase the flexibility of the liquidity and spread the interest risk. The Group also continued to expand the application of the international cash pooling system.

Group's loan facilities, which were renewed in 2006, include ordinary loan covenants, which set conditions among other things on corporate restructurings, continuation of business, disposal of assets and external obligations as well as the Group's financial indicators like investments, equity-to assets and gearing ratios, net debt to EBITDA ratio and cash flow to total debt service ratio. During second quarter of year 2009 the Group renegotiated its bank covenants and gained flexibility to its cash flow covenant for the rest of the year 2009 and first quarter of year 2010 and some other benefits. Consequently the interest rate margins were increased moderately and two less significant covenants were tightened slightly. The Board and Group management are monitoring the fulfillment of the bank covenants on a monthly basis. The Group does not foresee that the bank covenants would create exposures to its liquidity in near future.

The Group's credit limits not drawn at December 31, 2009 were EUR 46.6 million. Major part of the Group's credit limits is part of the Group's loan facilities renewed in 2006 and maturing in 2013. Group's domestic commercial paper program not sold at December 31, 2009 was EUR 6.0 million (2008: EUR 21.0 million).

Maturity of the Group's financial liabilities

The following are the contractual maturities of financial liabilities, including interest payments.

| 2009 EUR million | Carrying value | Financial liabilities ²⁾ | Contractual cash flows | 2010 | 2011 | 2012 | 2013 | 2014 | Later | Total |
|--|-------------------|--|---------------------------|-------------|-------------|-------------|-------------|------------|------------|--------------|
| Interest-bearing liabilities | | | | | | | | | | |
| Loans from financial institutions ¹⁾ | 77.2 | 77.2 | 78.7 | 50.7 | 10.1 | 9.9 | 8.0 | | | 78.7 |

2) The proportion of the carrying values which are classified as financial liabilities according to IAS 39.

3) Maturity of interest payable has been presented in the contractual cash flows of loans and commercial paper program.

4) Cash flows of interest rate and currency derivatives are calculated based on interest and foreign exchange rates as per Dec. 31

CREDIT AND DEFAULT RISK

The uncertainties relating to the development of the world economy and the financial markets continued during 2009 and thus further emphasized the importance of monitoring the credit and default risks associated with customers and other counterparties. However, there has not been significant changes in the Group's credit and default risk portfolio. Some individual customers have entered into bankruptcy processes, which have led to some loss of sales, but not to any significant credit losses. The absolute and proportional share of the Group's trade receivables which are past due date reduced in year 2009 compared to year 2008 and the credit loss net allowances for trade receivables increased only very moderately from year 2008 to year 2009.

The Group's accounts receivables are generated by a large number of customers worldwide. Consequently, the credit risk is spread against multiple counterparties. The credit risk management is allocated to each operative business unit. Before providing credit to any new customer, background checks are carried out. Cash, advance payments and letters of credit are also applied with new and existing customers. Customer specific credit limits and financial situation of the existing credit customers are monitored and set locally in each business unit. Customers' payment behavior is monitored regularly and delays in payments may trigger payment reminders, stopping the shipments, requirements for advance payments for future shipments and eventually legal collection procedures. In significant cases, business units consult with the CFO or Group Risk Manager before final decisions. In exceptional cases, payment terms may be renegotiated. In one country, credit risk is further reduced with credit insurance.

Group Risk Management manages most of the credit and default risk related to financial instruments. It seeks to reduce these risks by limiting the counterparties to banks, which have a good credit standing. Majority of the Group's bank deposits and forward contracts have been made with the Group's leading banks (Nordea Bank Finland Plc and Pohjola Bank Plc), whose credit ratings are Aa2 (Moody's) and AA- (Standard&Poor's) for both. Moody's downgraded the ratings of several Nordic banks, including Nordea and Pohjola, in 2009. Group's all investments related to liquidity management are made in liquid instruments with low credit risk. For instance commercial paper investments are not made.

The Group's maximum credit and default risk is the carrying amount of all financial assets which are disclosed in note 23.

For information on allowance for trade receivables, see note 17. An allowance of trade receivables is made when there is objective evidence (such as significant overdue of receivables and unsuccessful dunning attempts or known financial difficulties and thus increased probability of customer insolvency) that the Group will not be able to collect all amounts due according to the original terms of the receivables. The assessment and decision for allowances is done locally in each business unit on case-by-case basis.

No allowance is made on overdue trade receivables from customers, whose solvency is considered solid.

Analysis of trade receivables that were due but not impaired

| EUR million | 2009 | 2008 |
|------------------------------|------|------|
| Neither past due or impaired | 30.4 | 29.5 |
| Past due but not impaired | | |
| Less than 1 month | 3.1 | 5.0 |
| 1-3 months | 3.1 | 4.2 |
| 4-5 months | 1.1 | 1.7 |
| 6-7 months | 0.5 | 1.1 |
| Over 7 months | 0.7 | 1.0 |
| Total | 38.9 | 42.5 |

CAPITAL MANAGEMENT

The objective of the Group's capital management is to ensure that it maintains healthy capital ratios in order to support its business and to maximize shareholder value. Therefore, the Group seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

The Group manages its capital structure and makes adjustments to it taking into account changes in economic conditions and requirements of strategy implementation. To maintain or develop the capital structure, the Group may adjust the dividend payments and repayments of capital to shareholders by buying back shares, issue new shares and/or increase/decrease the amount of borrowings.

The Group monitors the effectiveness of its capital management using gearing ratio, return on equity, average interest rate on net interest-bearing debt, net interest-bearing debt to EBITDA and equity-to-assets ratio. The Group objective for capital management is to keep:

1. Gearing ratio below 150%,
2. Return on equity clearly above the average interest rate on net interest-bearing debt,
3. Net interest-bearing debt to EBITDA below 4.0, and
4. Equity-to-assets ratio above 33%.

For definitions of key figures, see page 17.

| EUR million | 2009 | 2008 |
|---|-------|-------|
| Non-current interest-bearing liabilities | 36.0 | 42.8 |
| Current interest-bearing liabilities | 73.1 | 78.1 |
| Cash and cash equivalents | 29.0 | 30.6 |
| Interest-bearing receivables | 0.7 | 0.9 |
| Net interest-bearing debt at the end of the period | 79.4 | 89.5 |
| Total equity Dec. 31 | 111.7 | 103.7 |
| Debt-to-equity (gearing) ratio, % | 71.1 | 86.4 |
| Net profit for the period | 14.3 | 19.2 |
| Total equity Jan. 1 | 103.7 | 96.9 |
| Total equity Dec. 31 | 111.7 | 103.7 |
| Total equity (average for the period) | 107.7 | 100.3 |
| Return on equity, % | 13.3 | 19.2 |
| Net interest expense | 3.5 | 5.1 |
| Net interest-bearing debt Dec. 31 | 79.4 | 89.5 |
| Average interest rate on net interest-bearing debt, % | 4.4 | 5.7 |
| Net interest-bearing debt at the end of the period | 79.4 | 89.5 |
| Operating profit before depreciation and impairments (EBITDA) | 28.9 | 37.5 |
| Net interest-bearing debt to EBITDA - ratio | 2.7 | 2.4 |
| Total equity | 111.7 | 103.7 |
| Total shareholders' equity and liabilities | | |
| - advances received | 261.1 | 272.7 |
| Equity-to-assets ratio, % | 42.8 | 38.0 |

In 2009, the Group met its objectives for capital management:

1. Gearing ratio was 71.1% (2008: 86.4%),
2. Return on equity, 13.3% (2008: 19.2%), was clearly higher than the average interest rate on net interest-bearing debt, which was 4.4% (2008: 5.7%).
3. Net interest-bearing debt to EBITDA was 2.7 (2008: 2.4).
4. Equity-to-assets ratio was 42.8% (2008: 38.0%).

The Group capital structure is reviewed by the Board annually. The Group is not subject to externally imposed capital requirements other than the financial covenants set by the banks. For more information on financial covenants set by the banks, see section on liquidity risks.

23. FINANCIAL ASSETS AND LIABILITIES BY CATEGORIES AND FAIR VALUES

FAIR VALUE ON FINANCIAL ASSETS AND LIABILITIES

Fair value hierarchy levels

The fair values of the financial assets and liabilities on the hierarchy level 1 are based on quoted market prices of similar financial instruments traded in an active market. Currently there are no financial instruments on level 1.

The fair values of the financial assets and liabilities on the hierarchy level 2 are based on other price information than quoted market prices for a significant part of the valuation. This information is supported by observable market inputs either directly (i.e. prices) or indirectly (i.e. derived from prices).

The fair values of the financial assets and liabilities on the hierarchy level 3 are calculated using a valuation technique based on assumptions that are not supported by available observable market data. For example management estimates are utilized in generally accepted valuation models of the financial instruments on the level 3.

The fair value hierarchy level, into which the entire financial asset or liability is classified, is determined based on the lowest-hierarchy-level information being significant for the valuation of that particular financial asset or liability. The significance of the information is estimated considering the financial asset or liability in its entirety.

No significant transfers between the hierarchy levels took place during the financial period.

Available-for-sale investments

Available-for-sale investments comprise of unlisted shares that are measured at fair value. Certain unlisted shares for which fair values cannot be measured reliably are measured at cost less possible impairment.

Derivatives

All derivatives are initially recognized at fair value on the date derivative contract is entered into, and are subsequently remeasured at fair value on each balance sheet date. Determination of fair values is based on quoted market prices and rates, discounting of cash flows and option valuation models.

Finance leases

The fair value of finance lease liabilities corresponds to their book value. The fair value of finance leases is based on discounted future cash flows. The discount rate used corresponds to that applied to similar finance leases.

Current financial assets and liabilities

Due to their short maturity, the fair value of current financial assets and liabilities is regarded as corresponding to their original carrying amount.

Non-current financial assets

The fair value of non-current financial assets is based on discounted future cash flows. The discount rate used corresponds to the market rate on the balance sheet date.

Non-current interest-bearing liabilities

On December 31, 2009, 74.8% of non-current loans based on floating rates was connected to one-month euribor, libor or similar and the rest to maximum three-month euribor, libor or similar. Therefore, the fair value of non-current loans based on floating rates is regarded as equaling their book value. A part of non-current loans on floating rates is hedged with separate interest rate derivatives which are described in Note 22. The fair value of non-current loans on fixed rates is based on discounted future cash flows. The discount rate used corresponds to the market rate on the balance sheet date.

Non-current non-interest-bearing liabilities

Contingent considerations of business combinations and other acquisitions are recognized at fair value on the date of acquisition. Determination of fair values is based on discounted future cash flows.

24. INTEREST-BEARING LIABILITIES

| EUR million | 2009 | 2009 | 2008 |
|---|--|------|------|
| | Average interest rate, % ¹⁾ | | |
| Non-current interest-bearing liabilities | | | |
| Loans from financial institutions | 1.38 | 27.3 | 38.4 |
| Pension loans | 2.26 | 8.2 | 4.0 |

| Other accrued expenses and deferred income | 4.2 | 3.8 |
| Other current liabilities | 2.8 | 2.4 |
| Total | 32.7 | 41.7 |

Other non-current non-interest-bearing liabilities include contingent considerations of business combinations and other acquisitions on the date of acquisition. Contingent considerations of business combinations are recognized at fair value. Determination of fair values is based on discounted future cash flows.

Due to their short maturity, the fair value of current non-interest-bearing liabilities is regarded as corresponding to their book value.

26. COMMITMENTS AND CONTINGENCIES

COMMITMENTS

| EUR million | 2009 | 2008 |
|----------------------|------|------|
| On own behalf | | |
| Business mortgages | 16.1 | 16.1 |
| Guarantees | 0.2 | 0.3 |
| Total | 16.3 | 16.4 |

The mortgages given as security for own commitments include a business mortgage of the parent company of EUR 16.1 million. Since Normark Sport Finland Oy, a 100% owned subsidiary of Rapala VMC Corporation, is the legal shareholder of the distribution joint venture with Shimano, the parent company has guaranteed to Shimano the fulfillment of its subsidiary's obligations related to the joint venture.

Group's lease commitments are presented in note 27.

DISPUTES AND LITIGATIONS

In 2008, the Group appealed to the Administrative Court against the Finnish tax authorities' decision made in 2007, based on which the parent company's taxation has been amended since 2004. The appeal has not yet been processed. The taxes and the penalties for delayed payments levied by the tax authorities have been fully paid and booked. The cumulative disputed taxes totaled EUR 4.0 million on December 31, 2009.

The Group's management does not have knowledge of any other open disputes or litigations, which would have a significant impact on the Company's financial position.

27. LEASE CONTRACTS

THE GROUP AS A LESSEE

Future minimum rental payable under non-cancellable operating lease commitments

| EUR million | 2009 | 2008 |
|--------------------|------|------|
| Within one year | 4.5 | 4.0 |
| 1-3 years | 4.1 | 4.5 |
| 3-5 years | 0.8 | 1.8 |
| Later than 5 years | 0.8 | 1.1 |
| Total | 10.3 | 11.3 |

The Group leases offices, warehouses and manufacturing facilities under several non-cancellable operating leases. The leases have varying terms and lengths, some of which may contain renewal options.

THE GROUP AS A LESSOR

Future minimum rental receivable under non-cancellable operating leases

| EUR million | 2009 | 2008 |
|-----------------|------|------|
| Within one year | 0.1 | 0.1 |
| 1-3 years | 0.0 | 0.1 |
| Total | 0.1 | 0.2 |

Some of the offices, warehouses and manufacturing facilities that are currently not used by the Group are leased to external parties. The leases have varying terms and lengths, some of which may contain renewal options.

28. RELATED PARTY TRANSACTIONS

Subsidiaries owned directly or indirectly by the parent company as well as foreign branches are listed in note 33. Related party transactions between Group companies have been eliminated.

TRANSACTIONS AND BALANCES WITH RELATED PARTIES

| EUR million | Purchases | Paid rents | Other expenses | Receivables | Payables |

1) Lease agreement for the real estate for the consolidated operations in France and a service fee.

EMPLOYEE BENEFITS FOR TOP MANAGEMENT

| EUR million | 2009 | 2008 |
|---|------|------|
| Salaries and other short-term employee benefits | -2.5 | -2.4 |
| Costs for option programs to be settled in shares | | 0.0 |
| Costs for option programs to be settled in cash | 0.0 | -0.1 |
| Costs for share rewards | -0.1 | |
| Total | -2.6 | -2.5 |

Top management consists of members of the Board of Directors, CEO and other members of the Executive Committee. In 2009, there were no changes in the Board of Directors or in the Executive Committee. In 2008, one new member was appointed to the Executive Committee and one member resigned.

On December 31, 2009, the members of the Board and the Executive Committee held directly a total of 1 795 319 (31.12.2008: 912 056) Company shares and indirectly through a controlled corporation 1 160 000 shares. Top management owned approximately 7.5% (5.2%) of the issued share capital and voting rights of Rapala on December 31, 2009.

In 2009 and 2008, no options were granted to top management. On December 31, 2009, top management held 291 250 options of which 213 750 options were exercisable (on December 31, 2008, 427 500 options of which 272 500 options were exercisable). The option scheme principles are the same for top management as for other employees.

In 2009, the Board approved a new share-based incentive plan for the Group's 50 key employees. For more information on share-based payments, see note 29 and the section 'Shares and Shareholders'. Details of top management shareholdings and options are given on page 60.

The Group's business transactions or outstanding balances with top management or close members of their family are presented in the table 'Transactions and balances with related parties'.

EMPLOYEE BENEFITS FOR CHIEF EXECUTIVE OFFICER

| EUR million | 2009 | 2008 |
|---|------|------|
| Salaries and other short-term employee benefits | -0.4 | -0.5 |
| Costs for option programs to be settled in shares | | 0.0 |
| Costs for option programs to be settled in cash | 0.0 | 0.0 |
| Costs for share rewards | 0.0 | |
| Total | -0.4 | -0.5 |

The monthly salary of the CEO is EUR 23 542. CEO is also entitled to a profit bonus according to the principles of the Group's senior management bonus scheme. His bonus accrued for 2009 totaled EUR 109 400 (2008: EUR 110 000). In addition to the mandatory pension insurance, CEO has the right to receive further compensation of EUR 8 400 annually to be placed in a voluntary pension scheme or a similar arrangement. The retirement age and pension of CEO are determined in accordance with the legislation in force. The Company shall give notice at any time or using 24 months notice period and CEO shall give notice 3 or 6 months prior to terminating the service contract. The term of notice is dependent on the cause for termination of employment. If the service agreement is terminated by the Company without a cause, CEO is entitled to severance compensation corresponding to 24 months' salary (excluding profit bonuses).

EMPLOYEE BENEFITS FOR OTHER MEMBERS OF THE EXECUTIVE COMMITTEE

| EUR million | 2009 | 2008 |
|---|------|------|
| Salaries and other short-term employee benefits | -1.9 | -1.7 |
| Costs for option programs to be settled in shares | | 0.0 |
| Costs for option programs to be settled in cash | 0.0 | 0.0 |
| Costs for share rewards | -0.1 | |
| Total | -2.0 | -1.8 |

In addition to the monthly salary, CEO and other members of the Executive Committee participate in the Group's senior management bonus scheme. The amount and payment of the bonus requires that the EBITDA and cash flow targets are achieved. If the targets are not achieved, payment of bonus is fully at the discretion of the Board of Directors. Bonuses awarded under the scheme are paid in two installments, the first when the audited results for the relevant financial year are known and the second after a predetermined vesting period of a few months, to encourage retention of senior management.

EMPLOYEE BENEFITS FOR BOARD OF DIRECTORS

| EUR million | 2009 | 2008 |
|---|------|------|
| Salaries and other short-term employee benefits | -0.2 | -0.2 |
| Costs for option programs to be settled in shares | | 0.0 |
| Total | -0.2 | -0.3 |

Chairman of the Board is paid an annual remuneration of EUR 60 000 and other Members of the Board of Directors an annual remuneration of EUR 30 000. The members of the Remuneration Committee do not receive further compensation. Members of the Board of Directors are paid a daily travel allowance and reimbursed for travel expenses following the company's traveling compensation principles. Members of the Board of Directors were paid a total of EUR 240 000 for their work on the Board of Directors and the Remuneration Committee in the financial year 2009 (2008: EUR 240 000).

29. SHARE-BASED PAYMENTS

The Group has applied the requirements of IFRS 2 (Share-based Payments) to all share-based payment programs granted after November 7, 2002 that were unvested as of January 1, 2005. The Group had three separate share-based payment programs in place on December 31, 2009: one share option program (2004), one synthetic option program settled in cash (2006) and one share reward program (2009). Share-based payment programs are valued at fair value on the grant date and recognized as an expense in the income statement during the vesting period with a corresponding adjustment to the equity or liability. In the cash settled option program and in the share reward program the liability is revalued at each balance sheet date with changes in fair value recognized in the income statement. The income statement effect of the share-based payment programs is recognized in employee benefit expenses.

On March 31, 2009, the exercise period for the 2004A share option program expired. As a result of the share subscriptions with the remaining stock option program (2004B), and if all stock options are fully exercised, the Group's share capital may still be increased by a maximum of 38 970 EUR and the number of shares by a maximum of 433 000 shares. The shares that can be subscribed with these stock options correspond to 1.1% of the Company's shares and voting rights.

In 2009, the Board approved a new share-based incentive plan for the Group's 50 key employees. For more information on share-based payment programs, see section 'Shares and Shareholders'.

GENERAL TERMS AND CONDITIONS OF THE SHARE-BASED PAYMENT PROGRAMS

| | 2004A I (expired) | 2004A II (expired) | 2004B I | 2004B II | 2006A | 2006B | 2009 |

| Term of contract | June 8, 2004– Mar. 31, 2009 | Feb. 14, 2006– Mar. 31, 2009 | June 8, 2004– Mar. 31, 2010 | Feb. 14, 2006– Mar. 31, 2010 | Dec. 14, 2006– Mar. 31, 2011 ³⁾ | Dec. 14, 2006– Mar. 31, 2012 ³⁾ | June. 23, 2009– Mar. 15, 2011 |
| Vesting period | June 8, 2004– Mar. 31, 2007 | Feb. 14, 2006– Mar. 31, 2007 | June 8, 2004– Mar. 31, 2008 | Feb. 14, 2006– Mar. 31, 2008 | Dec. 14, 2006– Mar. 31, 2009 | Dec. 14, 2006– Mar. 31, 2010 | June 23, 2009– Mar. 15, 2011 |
| Conditions of the agreement | 2) | 2) | 2) | 2) | 2) | 2) | 2) |
| Execution | In shares | In shares | In shares | In shares | In cash ³⁾ | In cash ³⁾ | In shares ⁴⁾ |

1) The exercise price has been reduced by the amount of dividends distributed after the subscription period for option rights has ended and before the commencement of the subscription period for shares. For more details on dividends, see note 31.

2) Employment during vesting period. As a general rule, in case of prior employment termination, options are forfeited.

3) The share-specific cash value will be determined in accordance with the end price on the test date (i.e. vesting date) or, as the case may be, on an additional test date. End price is the volume weighted average price of the share during the ten trading days before the test date. If at test date the difference between the exercise price and the end price (including the dividend adjustment) is positive, the reward will be paid. If the difference between the exercise price and end price on the test date (including the dividend adjustment) is negative, the end price will be determined again on an additional test date, which is the six, twelve, eighteen and twenty-four months' anniversary of the test date. If the difference between the exercise price and the end price is positive on any of the additional test dates, the reward will be paid and this incentive scheme shall automatically expire.

4) The potential reward from the plan will be based on the Rapala's earnings per share (EPS) in 2010. As a general rule, the reward will be paid in shares.

INPUT TO THE MODEL

| Option-pricing model | Black-Scholes | Black-Scholes | Black-Scholes | Black-Scholes | Black-Scholes | Black-Scholes |

The expected volatility has been determined by using the historical volatility of the share price. Period very close to Initial Public Offering, in December 1998, has been excluded from the history, since it is not considered to be qualitative for volatility estimation purposes. The historical volatility is calculated based on the weighted average remaining life of the share options. The expected life of the option is based on historical data. The non-market criteria are not included in the fair value of the option but taken into account in the number of options that are assumed to vest.

In 2008 and 2009, no options were exercised and no new options were granted. The weighted average remaining contractual life for the share options outstanding as of December 31, 2009 is 1.27 years (2008: 1.76 years). The range of exercise prices (reduced by the amount of dividends distributed) for options outstanding at the end of the year 2009 was EUR 5.95–6.14 (2008: EUR 5.96–6.14).

MOVEMENT IN NUMBER OF OPTIONS AND WEIGHTED AVERAGE EXERCISE PRICES OF OPTIONS DURING THE YEAR

| | 2009 | | 2008 | |
|------------------------------------|-----------|---|-----------|---|
| | Pcs. | Weighted average exercise price EUR/share | Pcs. | Weighted average exercise price EUR/share |
| Outstanding Jan. 1 | 1 822 000 | 6.08 | 2 318 668 | 6.15 |
| Forfeited during the year | -21 000 | 6.05 | -50 500 | 6.14 |
| Expired during the year | -457 500 | 5.96 | -446 168 | 6.02 |
| Outstanding Dec. 31 | 1 343 500 | 6.06 | 1 822 000 | 6.08 |
| Exercisable at the end of the year | 884 500 | 6.12 | 899 500 | 6.02 |

SHARE-BASED PAYMENT RECOGNITION IN THE INCOME STATEMENT

| Social security expenses liability from share-based payments ⁵⁾ | 0.1 | 0.1 |

5) Included in current other non-interest-bearing payables.

When the stock options are exercised, the proceeds received, net of any transaction costs, are credited to share capital (nominal value) and share premium fund. No stock options were exercised in 2008 and 2009.

30. EARNINGS PER SHARE

| | 2009 | 2008 |
|--|--------|--------|
| Net profit for the period attributable to the equity holders of the Company, EUR million | 12.1 | 17.7 |
| Weighted average number of shares, 1000 shares | 39 208 | 39 403 |
| Effect of dilution | - | - |
| Diluted weighted average number of shares, 1000 shares | 39 208 | 39 403 |
| Earnings per share, EUR | 0.31 | 0.45 |
| Diluted earnings per share, EUR | 0.31 | 0.45 |

For more details on the calculations of earnings per share, see accounting principles for the consolidated accounts page 16.

31. DIVIDEND PER SHARE

The dividend paid for 2008 was EUR 0.19 per share, totaling EUR 7.5 million. A dividend of EUR 0.19 per share, a total of EUR 7.4 million, is proposed for the Annual General Meeting of Shareholders to be held on April 14, 2010. This dividend payable is not reflected in the financial statements for 2009.

32. EVENTS AFTER THE BALANCE SHEET DATE

The Group has no knowledge of any significant events after the balance sheet date that would have a material impact on the financial statements for 2009. Material events after the balance sheet date have been discussed in the Review of the Board of Directors.

1) In 2007, new restricted shares (RAP1VN0107) granted their holders the same rights as the old shares (RAP1V), except that these new shares did not give right to dividend paid from financial year 2007 and there was a lock-up period of 12 months. The new class of shares was combined to the old class of shares on October 24, 2008 when the difference regarding the right to dividend between the classes ended. For more details on RAP1VN0107 shares and its effect on share related key figures of 2007, see Annual Report 2007.

2) Excluding own shares.

NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

1. ACCOUNTING PRINCIPLES

The financial statements of Rapala VMC Oyj have been prepared according to Finnish Accounting Standards (FAS).

FOREIGN CURRENCY TRANSACTIONS

Monetary assets and liabilities denominated in foreign currencies are translated into euros using the exchange rates at the balance sheet date and exchange differences arising from translation are recognized in the income statement.

REVENUE RECOGNITION

Sales of goods and services are recognized on accrual basis when the significant risks related to goods and services sold have passed to the buyer and it is not probable that the client would return the goods. Net sales comprise of gross sales less cash discounts and sales taxes.

RESEARCH AND DEVELOPMENT COSTS

Research and development costs are expensed as they are incurred, unless they clearly relate to developing new business areas. Such development costs are capitalized if they are separately identifiable and if the products are assessed to be technically feasible and commercially viable and the related future revenues are expected to exceed the accrued and future development costs and related production, selling and administrative expenses, and other possible costs related to the project.

Capitalized development expenses are amortized on a straight-line basis over their expected useful lives, a maximum of five years.

INVENTORIES

Inventories are valued at the lower of cost or net realizable value using the first-in, first-out (FIFO) method. The cost of finished goods and work in progress comprises of raw materials, direct labor costs including social costs and other direct costs. Inventories are shown net of a reserve for obsolete or slow-moving inventories.

TANGIBLE AND INTANGIBLE ASSETS

Tangible and intangible assets are stated at historical cost excluding accumulated depreciation according to plan. Planned depreciation is based on historical cost and expected useful life.

Land is not depreciated. Depreciation is based on the following expected useful lives:

| | |
|-------------------------|---------------|
| Intangible assets | 3 – 15 years |
| Buildings | 10 – 20 years |
| Machinery and equipment | 5 – 10 years |
| Other tangible assets | 3 – 10 years |

PENSION ARRANGEMENTS

All of the company's pension arrangements are defined contribution plans, with the majority being local statutory arrangements. Pension costs are expensed as incurred.

VALUATION OF FINANCIAL DERIVATIVES

Financial derivatives are valued at fair value. Currently, the company has short-term standard and modified foreign currency forwards to which hedge accounting is not applied but which have been made to hedge cash flow exchange risk. Fair value of standard foreign currency forwards are determined by discounting the future nominal cash flows with relevant interest rates and then converting the discounted cash flows to the foreign currency using spot rates. The fair value of modified foreign currency forwards are received from the bank. The company also has an interest rate swap, which is designated and effective as cash flow hedge, in which the company pays fixed interest and received variable interest. The fair value of interest rate derivatives have been calculated using a discounted cash flow method and are received from the bank.

In cash flow hedges, changes in the fair value of derivative financial instruments that are designated and effective as hedges of future cash flows are recognized directly in equity and the ineffective portion is recognized immediately in the income statement.

CASH FLOW STATEMENT

Changes in financial position are presented as cash flows from operating, investing and financing activities.

2. NET SALES

| EUR million | 2009 | 2008 |
|-----------------------|------|------|
| By destination | | |
| North America | 16.3 | 14.4 |
| Nordic | 1.6 | 2.6 |
| Rest of Europe | 7.2 | 7.5 |
| Rest of the World | 3.0 | 3.5 |
| Total | 28.1 | 28.0 |

For The parent company's net sales consist of Lure Business which is included in Group Fishing Products in the consolidated operating segment reporting.

3. OTHER OPERATING INCOME

| Nominal value | 5.1 | 5.0 |
| Interest rate derivatives | | |
| Fair value | -0.5 | -0.4 |
| Nominal value | 97.6 | 13.7 |

In 2009, currency derivatives had an income statement effect of EUR 0.4 million (2008: EUR 0.3 million). Change in fair value of interest rate derivative has been directly booked to fair value reserve in equity.

Risk Management

The objective of Rapala's risk management is to support the implementation of the Group's strategy and execution of business targets. This is done by monitoring and mitigating the related threats and risks and simultaneously identifying and managing opportunities.

Rapala's Approach to Risk Management

The Board evaluates the Group's financial, operational and strategic risk position regularly and establishes related policies and instructions to be implemented and coordinated by Group management. The daily risk management activity is primarily allocated to the management of the business units.

The importance of risk management has increased when the Group has continued to expand its operations. Risk management continued to receive significant attention and new development initiatives by Group management also in 2009. In 2009, focus of Group level risk management actions was on foreign exchange, credit, liquidity, interest rate and hazard risks and further development of Group wide insurance programs as well as development of internal controls.

The following is a summary of key strategic, operational and financial risks and what the Group has done to mitigate these risks.

Strategic Risks

Sport fishing is one form of leisure hobby and the Group's products are competing against wide range of other hobbies. The Group is promoting the attractiveness of sport fishing through active sales and marketing as well as brand management. By utilizing its unique research and development processes and resources, the Group is constantly developing new products to meet consumer's needs and creating new needs for the consumers.

Brand portfolio and corporate reputation are among the most valuable intangible assets of the Group. Rapala is actively managing the

brands and their identity and securing that the value of the brands or corporate reputation is not jeopardized or violated by any means. The Group's brands are also legally protected.

Consumers relate the Group's brands to high quality, unique fishing experience, special functional features and trustworthy distribution channel. Consumers are able to differentiate illegal copy products and this does not constitute a strategic threat for the Group. The Group protects vigorously its intellectual property rights and acts against illegal copiers and distributors.

Sport fishing is dependent on availability of fresh fishing waters for fishes to live and breed. Increased pollution of the environment is a growing concern for the Group. Rapala is actively promoting initiatives to enhance environmental protection and increasing preparedness to comply with continuously tightening environmental regulations by taking steps to reduce the environmental impacts of its operations. The Group is also acting in the forefront to develop products, e.g. catch-and-release equipment, to comply with the fish protection initiatives. For more details on the environmental actions, see the section Corporate Responsibility and Sustainable Development.

The Group faces competition in all the markets where its products are sold. Due to uniquely wide distribution network, the Group's geographical market risk is truly globally spread, evening out seasonal and local market fluctuations.

Rapala has limited amount of global competitors. The biggest competitors do have significant power in their home markets, but globally the geographical scope of their operations is more narrow. Rapala's global distribution company network is unique in the industry and difficult to imitate. Within each market, Rapala's competitors are in many cases local fishing tackle producers operating with limited geographical scope and limited range of products. In some countries, competition is created by fishing tackle retailers selling their private label products, as well as internet sales to some extent. Established fishing tackle brands' expansion into new product categories is also creating

competition in some product segments. The strength of the Group's product development and brand portfolio, as well as flexibility to serve different markets with market-specific products ranges, are essential in succeeding in this competition.

The Group's production is spread out in several countries. Some of these countries include higher political risk but simultaneously provide access to competitive labor cost. The Group monitors the country risks and labor costs and seeks ways to manage production and distribution costs.

Manufacturing of sport fishing products is not dependent on any proprietary manufacturing technologies or patents. The Group's manufacturing units are actively monitoring the development of generic manufacturing technologies and considering the applications to production of its products.

Distribution of third party fishing and outdoor products creates a material part of the Group's sales. Due to geographical spread and multitude of the existing and potential suppliers, the Group is not critically dependent on any single product or raw material supplier. Rapala's strategic partnerships with Shimano (for the distribution of rods and reels) and Yao I (the producer of Group's Sufix fishing lines) have proven to be successes.

Rapala's customer base is extensively diversified geographically and quantitatively. Customers are mostly country-specific and not operating globally. The Group is not critically dependent on any single customer: even the biggest single customer represents less than 5% of the Group's net sales. Rapala is not largely engaged in direct consumer retailing. This is not considered to be a risk as consumer demand is largely driven by brand consciousness and alternative routes to market can be established when needed.

Rapala is expanding considerably through organic growth as well as mergers and acquisitions. Careful target selection, proper due diligence process and post-merger integration are key issues in securing that the expansion initiatives are successful and in line with the Group's strate-

gic objective of profitable growth.

Board evaluates the Group's strategic risks annually as part of the strategy process and Group management continuously monitors changes in the business environment. Strategic risk management in local jurisdictions is allocated to the management of each business unit.

Operational and Hazard Risks

Even if the fishing tackle business has traditionally not been strongly influenced by the increased uncertainties and downturns in the general economic climate, this may influence, at least for a short while, the sales of fishing tackle when retailers reduce their inventory levels and face financial challenges. While continuing, these uncertainties may also affect the amount retailers invest in advertising and promotions, which may affect consumer spending at least temporarily. Also quick and strong increases in living expenses and uncertainties concerning employment may temporarily affect consumer spending also in fishing tackle, even though historically the underlying consumer demand has proven to be fairly solid.

During the year the underlying consumer demand for the Group's products is seasonal and also impacted by unforeseeable factors such as weather. To offset the seasonality, the Group is engaged in production and distribution of winter fishing and sports equipment. The Group has also expanded its own distribution network to the southern hemisphere to mitigate the effects of seasonality.

Due to the seasonality in demand, the Group's product shipments concentrate annually to relatively short time periods, where supply problems could endanger the sales of the season. Similarly, lower than expected sales volumes may lead to excess inventories, as it is difficult to cancel committed orders within short notice.

There is a high level of dependency between the Group's manufacturing and distribution units and interruption at earlier stage of the supply chain can have knock-on effects throughout the rest of the organization. The importance of proper order forecasting and production planning has also increased. The related risks are managed with high level of cooperation between the manufacturing and distribution units, safety stocks and proper insurances. The Group-wide supply chain and logistics initiative started in 2009 is also tackling these risks relating to

operational efficiencies.

The Group's sales prices are primarily fixed annually or bi-annually, normally before each season. Sudden changes in raw material prices or foreign exchange rates may have significant impact on cost of some products. The Group aims to push increases in costs to the sales prices immediately or during a period of time. The Group's market risks and mitigation actions are analyzed in more detail in section Financial Risks.

In respect of manufacturing activities, the Group is not critically dependent on any single external production factor supplier. The increased use of subcontractors in China requires proper supplier management, but as such the Group is not critically dependent on any of these subcontractors. Availability of competent production labor is essential and the Group aims to maintain good employer reputation and personnel relations to achieve this.

There are significant dependencies between the Group's manufacturing units, which could cause supply problems e.g. in case of fire or other hazard. Such hazard could lead to property damages but also to business interruption losses throughout the supply chain. Therefore, Rapala has increased the emphasis of hazard risk management. The Group has together with an insurance company planned and executed a series of hazard prevention reviews to Group's key locations. Group management has also continued to build risk awareness throughout the organization.

The Group is, with assistance of an insurance broker, further developing the global insurance programs, which cover most of the Group companies. Global insurance policies, which take into account the Group's interdependency, are in place for property damage and business interruption, transportation as well as general and product liabilities.

Board evaluates the Group's operational risks at least once a year as part of the operational plans and budgets. Group management monitors and coordinates the continuous management of operational risks, which is the responsibility of the management of each business unit.

Financial Risks

The Group's financial risks consist of market risks, credit and default risks and liquidity risks. Board evaluates financial risks several times during the year and Group management monitors and manages them

continuously. Financial risks are discussed in detail, as required by IFRS 7, in note 22 to the consolidated financial statements.

Corporate Responsibility and Sustainable Development

Rapala recognizes its responsibility in relation to the shareholders, clients, employees and society as well as those with whom the Group does business. Rapala is committed to carry on business in an ethically correct manner and according to local or international legislation and regulations. The mission of Rapala is to provide a positive and strong human experience in the nature and especially in sport fishing and, therefore, the Group lives from and promotes a clean and healthy environment.

Group Strategy and Management Approach to Sustainable Development

Rapala's strategic objective is profitable growth, which is founded on a unique manufacturing, sourcing and R&D platform, a leading global distribution network in the fishing tackle industry and a strong brand portfolio with several leading brands. The Group's unique manufacturing platform consists of the world's largest lure manufacturing facility located in China, Europe's largest lure production facility with specialized factories in Finland, Estonia and Russia, the most advanced treble hook factory located in France, and high-quality knife manufacturing in Finland. Rapala has also developed an extensive sourcing platform and process to ensure high-quality but low-cost third party manufacturing for its selected products.

The Group's own personnel operate in some 30 countries and its products are sold to some 140 countries. Rapala has been in the lure business, which was the first product category for the Group, for some 70 years. The VMC hook operations acquired in 2000 will celebrate its 100-year anniversary in 2010. Marttiini knife manufacturing, acquired in 2005, has operated for more than 80 years already. Also many products still offered by the Group, have a life-cycle of several dozens of years. Almost all of the Group's products relate to outdoor life and sports with a close connection to nature.

In its operations, Rapala takes into account its personnel, the local societies and environment as well as health and safety issues. All Group companies worldwide co-operate transparently, honestly and responsibly with authorities, local societies and other relevant parties in economic, social and environmental matters.

Economic Responsibility

Rapala's purpose is to create value for its stakeholders including customers, personnel, suppliers and subcontractors as well as shareholders and investors who are interested in the Group's financial performance. The financial success provides the Group companies with the resources and possibilities to develop their operations in a responsible and sustainable way also in the future.

Rapala focuses on profitable growth to increase shareholder value. This objective is achieved by providing customers with high-quality products and service, creating long-lasting partnerships with suppliers, subcontractors and customers, and offering employees competitive

compensation and good working conditions. With operations in some 30 countries worldwide, Rapala also influences and creates well-being for the local societies. The Group's value added is distributed to these different stakeholders as shown in the graph below.

Rapala creates value for its customers by offering its products and services worldwide. By market areas, North America contributed 28% (26%), Nordic countries 24% (24%), Rest of Europe 35% (39%) and Rest of the World 13% (11%) to the Group's total net sales. See Note 2 of the consolidated financial statement for detailed geographical information. In 2009, Group companies paid interests of EUR 3.4 million (EUR 6.2 million) to financial institutions and corporate income taxes of EUR 5.3 million (EUR 8.0 million) to tax authorities worldwide. As presented in the graph below, the shareholders of the Company were paid dividends of EUR 7.5 million in 2009 (EUR 6.9 million).

Social Responsibility

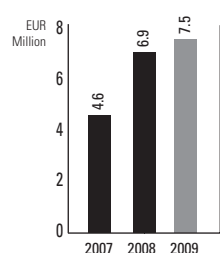

Importance of Competent and Motivated Personnel

With more than 2 000 employees in some 30 countries worldwide, Rapala recognizes the importance of competent and well-motivated personnel. Rapala appreciates the continuous development of its employees who have possibilities to both on-the-job learning and special training or education. The Group's strategy for profitable growth requires that the management systems, the group-wide knowledge sharing and the everyday practices are developed systematically in all Group companies. Personnel coaching and instructions together with good working conditions and appropriate protective equipment are important to minimizing

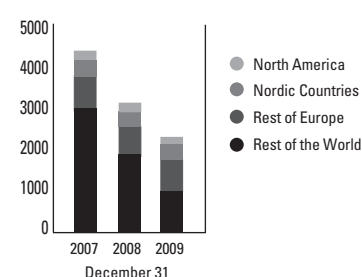

Distribution of Value Added

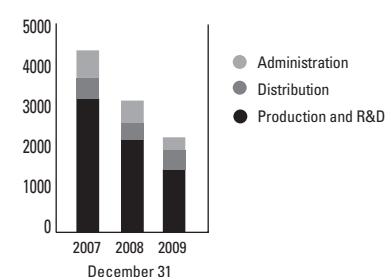

Dividends to Shareholders

Personnel by Geographical Areas

Personnel by Functions

occupational health and safety risks. The human resources management practices vary between the Group companies depending on the nature of the business units' operations in manufacturing, distribution, research and development and administration, and, to some extent, between different geographical areas do the different regulations and local practices.

One of the Group's key values in the corporate culture is entrepreneurship. Rapala respects diversity and equal opportunities of all employees irrespective of color, nationality, gender, age or religion. Rapala employs men (49%) and women (51%) of all ages as shown in the presented graphs. Rapala's employees represent tens of different nationalities worldwide. There is no use of child labor in the Group's manufacturing or other operations. At the end of 2009, 64% (68%) of the employees worked in manufacturing or R&D, 14% (18%) in administration and 22% (14%) in distribution in 2009.

The Group's employee benefit expenses of EUR 53.8 million (EUR 57.5 million) represent 23% (24%) of the consolidated net sales. The employee benefits include wages, salaries, pension and other social security costs as well as other performance incentives. The CEO and senior management participate in the Group's senior management bonus scheme encouraging the achievement of the Group's targets and the performance improvement. More information on top management remuneration can be found in Rapala's Corporate Governance Statement which is available at www.rapala.com.

The operational changes and performance improvement initiatives carried out in the Group's Chinese manufacturing facilities and in the European operations target to the positive development of the

Group's profitability with enhanced efficiencies and quality. While these improvement initiatives resulted in personnel reductions, Rapala strived to act responsibly and in accordance with local legislation and practices as well as good human resources management principles. In 2009, the number of personnel decreased by 930 employees in China.

Supporting Local Societies and Human Rights

When operating in 30 countries and expanding its business into new markets, Rapala supports the sustainable development of local societies and the protection of human rights. Group companies worldwide contribute to many fundraising campaigns of local societies, and, for example, donate fishing equipment as prizes and encouragement for fishing competitions and environmental cleaning projects organized by non-profit organizations.

Rapala is a founder member of the European Fishing Tackle Trade Association (EFTTA) which was established in London in 1981, as an international, independent association to serve the European fishing tackle trade by campaigning to promote sport fishing, environmental issues and international business. Rapala has its own representative in EFTTA's Board. EFTTA supports annually several environmental and training projects across Europe.

For more than a decade already, Rapala's Swedish subsidiary has been the sole supporting partner to one of the world's most professional sport fishing educational institute, the Sport Fishing Academy (SFA) in Sweden. SFA has educated more than 600 dedicated and advanced sport fishing instructors and guides, marine conservationists and special-

ists to the international markets. Rapala provides the students and their teachers with fishing tackle and with business and fishing expertise. SFA has expanded also to hunting and each year Rapala awards four scholarships to the academy's fishing and hunting branches.

With two well-known local non-profit organizations, Rapala has established and sponsors a fish farm in North-West Tanzania. The objectives of the project is to help the local population to have access to a steady supply of protein-rich food as well as a regular employment and long-term income to all those involved in the activity. Additionally, fish farming relieves the pressure of over-fishing on Lake Victoria and leads to the control over both trade and the environment encouraging Lake Victoria's ecology and wealth.

In Sortavala, Russia, Rapala supports the local kindergarten and elementary school encouraging the children to educate and develop themselves. In 2009, the Group also provided in cooperation with the insurance company If a total of 500 reflectors for children to protect them in the dark autumn and winter time in the area with nearly no street lights.

High-Quality Products and Services

Today Rapala's distribution network covers the four major continents and is locally present in some 30 different countries. It allows the Group to introduce new products efficiently and effectively to these markets and to build long lasting partnerships and alliances with local retailers and fishermen.

Rapala's research and development is globally well known and re-

Percentages of Men & Women

Age of Personnel

spected for its capability to continuously bring new high-quality products with new and exceptional features to meet the fishermen's demanding expectations. The Group's wide distribution network acts as a channel for market and customer input, which is used for product development.

As a proof of the quality and continuous development, Rapala holds the number one position in world records with more than 840 world-record catches according to the International Game Fish Association (IGFA).

Rapala's research and development expenses of EUR 2.0 million in 2009 (EUR 1.8 million) represent 14% (9%) of the Group's net profit for the period.

Environmental Responsibility

Rapala's Approach to Environmental Affairs

Healthy and clean environment is important for Rapala for the reason that its sport fishing, hunting and outdoor businesses originate from, and are based on, human experience in the nature. Industrial and business activities inevitably create various impacts on the environment that the Group is trying to manage in a way that also future generations of man would be able to go and experience the nature using Rapala's products. In addition, the Group promotes environmental issues beyond its own operations.

The use of raw materials, airborne emissions and waste are the most significant environmental impacts of the Group. Rapala is improving its environmental performance through continuous development

efforts, by increasing awareness and actively developing processes to replace hazardous materials and decreasing the use of energy and increasing the effectiveness in the use of raw materials. The Group aims to develop its products, manufacturing processes and operating methods so that their environmental impact throughout the product's lifecycle will remain as small as possible. This process is long-lasting and, meanwhile, changes in production volumes and product mix may have greater short-term effects than the development trend as such.

Our manufacturing sites develop their environmental operations in accordance with local legislation and regulation.

Possible safety risks in manufacturing operations are caused by handling of flammable and toxic raw materials during the production process.

More than one third of Rapala's sales come from outsourced and third party products. The most significant environmental impacts of these products, while in Group ownership, are related to transportation and storage of goods.

Rapala and its Group companies operate in line with the local environmental laws and regulations. Ways of conducting business, including internal and external business processes, are continuously developed keeping in mind the environmental aspects and the principles of sustainable development.

Several Group companies are members of local and national environmental organizations. They take part in the funding of these organizations, providing education on clean and healthy waters and

other environmental issues and participating in clean-up actions.

The following is a summary of practical actions and measurements the Group is taking to minimize the negative impacts of its business to environment and actions to improve environmental affairs in areas where it operates.

Production Processes

Less than 50% of the products sold by Rapala are produced in the Group's own manufacturing facilities. In order to minimize the waste in painting, the lures are electronically engaged for better adherence of the paint. With this advanced painting technique, also usage and waste of lacquer is minimized.

Production waste is separated into energy, plastics, bio materials, metals, carton, paper waste and hazardous materials to promote and increase recycling. In addition, some of the Group's factories have replaced oil as an energy source with gas, which is more environmental friendly. In Finland and partly also in China, paint has partly been changed from soluble dies to water-dilutable to reduce VOC emissions. The long-term plan is to develop qualities of current paint to fully replace soluble dies with water-dilutable paints.

Raw Materials

Hard-body lures manufactured by the Group are made of balsa, apache and plastics. An important part of the wood is sourced from the registered farms that respect the local law and regulations and sustainable

development rules in farming and forestry. The Group's research and development department continuously seeks for possibilities to replace currently used raw materials with more environmentally friendly substitutes that do not decrease the desired features of the products. The Group is also working in cooperation with external suppliers in order to find more environmental friendly raw materials.

Products

Most of the Group products are long-lasting, kept and used by consumers for years and even decades. All of the wooden parts of the Group products are biodegradable and most of the metal used in the Group products can be recycled. The biggest environmental challenge has been the plastic products but the Group has successfully progressed in developing and replacing certain models with biodegradable plastics. Even if some of the products may end up in the water or nature during e.g. the sport fishing activities, the important challenge is to get the consumers to make their unused or damaged products available for recycling.

Transportation and Storage of Goods

To reduce the environmental impacts of transportation, the Group aims to maximize sea transportation and minimize air transportation between the continents, from the factories to distribution units. The Group also aims to consolidate the shipments so that small quantities will not be shipped separately. The storage of goods does not have much impact on environment other than use of energy for heating and lighting of the premises. The Group also optimizes its production to minimize the shipping volumes between factories and distribution companies and manages inventories to minimize the volume of goods stored.

Special Issues and Actions in 2009

In 2009, Rapala has continued to develop and increased the reporting and follow-up of environmental affairs. More work is still needed to further develop these indicators and to standardize the measurement but especially to implement new ways of working to ensure long-term improvement in the underlying environmental effects.

Rapala lure factory in Finland started to use water-based closed-cycle cleaning methods replacing old chemical based methods to wash

painting tools.

Environmental R&D work especially on biodegradable plastics proceeded in 2009. The first biodegradable products under Trigger X brand launched in 2008 have been well received by the retailers, and development work for new models is under way.

In 2009, the Group companies participated in several countries in fisheries restoration and recreational fishing promotion campaigns. In the following paragraphs we summarize few of these actions.

In the USA, Rapala continued the participation in a project organized by Northwest Sportfishing Industry Association (NSIA) to support the efforts to preserve and restore the fisheries environment. Through the efforts of NSIA, fisheries that had been closed to fishing for decades are now open due to a mass marking program of all Columbia River hatchery salmon and steelhead. NSIA has also convinced the Columbia River hydroelectric owners to increase the spill over the dams to further assist the down river migration of salmon and steelhead smolts, which has significantly increased their survival rates.

In Norway, the Group participated in several projects, which aim to restore fisheries and certain species of fish, and promote recreational fishing experience. In Finland, Rapala continued to support a project to study the move of salmon and trout in the River Vantaa and raise the awareness of environmental aspects and the fishing opportunities close to the capital of Finland. In addition, the Group supported cleaning of lakes, rivers and sea shores as well as environmental and fishing related education in many countries such as South Africa.

No material non-compliance, environmental accidents or hazards occurred in 2009.

Environmental Performance in 2009

Rapala monitors the emissions to air of its own manufacturing operations globally. In 2009, the Group changed the operating model of its Chinese manufacturing operations into decentralized, outsourced based manufacturing. The Group's Chinese manufacturing operations consists now from four own factories and dozens of outsourcing partners. Accordingly, the level of in-house manufacturing is much smaller in 2009 compared to 2008. These developments have resulted also in significant changes on the direct environmental measures of the Group manufactur-

ing operations as shown in the presented graphs.

The most significant emissions for the Group are the volatile organic compounds (VOC) and carbon dioxides (CO₂). Rapala's VOC emissions are calculated based on materials used in production, and carbon dioxides are calculated based on energy purchased and fuel used. In 2009, Rapala's VOC emissions were 134 (246) tons and carbon dioxide emissions were 52 (219) thousand tons. VOC emissions originate mainly from different types of solvent used in conjunction with painting operations. Majority of the CO₂ emissions are created indirectly when energy produced elsewhere is purchased and consumed by the Group factories.

Rapala's operations generate e.g. metal, wood, plastics, cardboard and municipal waste. Significant part of the waste is biodegradable like wood or recyclable like metals. Waste is recycled in compliance with local regulations and practices. In 2009, Rapala's operations generated 485 tons (641 tons) of waste of which 108 tons (113 tons) were hazardous waste, which is processed by disposal facilities dedicated for hazardous waste.

Rapala manufacturing is not very energy-intensive but energy consumption is an environmental aspect measured by for the Group. The majority of the energy is consumed in the form of electricity, natural gas and district heat. Fuel oil is used in some units for reserve and additional energy. In 2009, Rapala's total energy consumption was 229 TJ (331 TJ). The majority of this is electricity. This amount does not include the fuels used in transportation and vehicles.

Rapala manufacturing units do not use much water in their processes. Most of the use is for sanitation and catering purposes. In 2009, the water consumption was 31 000 m³ (184 000 m³).

In 2009, the Group environmental expenses were some EUR 0.3 million (EUR 0.2 million) and environmental investments some EUR 0.1 million (EUR 0.2 million).

Shares and Shareholders

Rapala's shares have been traded on the NASDAQ OMX Helsinki since 1998. In 2009, the shares traded between EUR 5.16 and 3.50 with an average price of EUR 4.46.

Shares and Voting Rights

On December 31, 2009, the share capital fully paid and reported in the Trade Register was EUR 3.6 million and the total number of shares was 39 468 449 (2008: 39 468 449). The book value of a share is EUR 0.09. Each share is entitled to one vote.

Board's Authorizations

Based on authorization given by the Annual General Meeting (AGM) in April 2007, the Board can decide to issue shares through issuance of shares, options or special rights entitling to shares in one or more issues. The number of new shares to be issued including the shares to be obtained under options or special rights shall be no more than 10 000 000 shares. This authorization includes the right for the Board to resolve on all terms and conditions of the issuance of new shares, options and special rights entitling to shares, including issuance in deviation from the shareholders' preemptive rights. This authorization is in force for a period of 5 years from the resolution by the AGM. The Board is also authorized to resolve to repurchase a maximum of 2 000 000 shares by using funds in the unrestricted equity. This amount of shares corresponds to less than 10% of all shares of the Company. Shares can be repurchased by deviating from the proportion in which the company's shareholders own shares in the company. The shares will be repurchased through public trading arranged by NASDAQ OMX Helsinki at the market price of the acquisition date. The shares will be acquired and paid in pursuance of the rules of NASDAQ OMX Helsinki and applicable rules regarding the payment period and other terms of the payment. This authorization is effective until the end of the next AGM.

Own Shares

On February 6, 2009, the Board decided to continue buying back own shares in accordance with the authorization granted by the Annual General Meeting on April 3, 2008. The repurchasing of shares ended on March 30, 2009 when Rapala held 221 936 own shares. Based on the authorization of the AGM held on April 7, 2009 and the Board's decision on July 24, 2009 the repurchasing of own shares continued until September 18, 2009 and on September 30, 2009 Rapala held 321 867 own shares. Based on the Board's decision on October 23, 2009 the repurchasing of own shares continued until December 30, 2009. At the end of December 2009, Rapala held 340 344 own shares, representing 0.9% of the total number and the total voting rights of Rapala shares. The average price for the repurchased own shares in January-December 2009 was EUR 4.31. The average share price of all repurchased own shares held by Rapala was EUR 4.12

Changes in Share Capital

There were no changes in the share capital in 2009.

Shareholder Register

The shares of the Company belong to the Book Entry Securities System. Shareholders should notify the particular register holding their Book Entry Account about changes in address or account numbers for payment of dividends and other matters related to ownership of shares.

Shareholder Agreement

Viellard Migeon & Cie (VM&C) and Utavia S.à.r.l (Utavia) entered into a shareholders' agreement on June 29, 2006 with respect to their shares in Rapala, and the shareholders of Utavia have agreed to be bound by the said shareholders' agreement. The main shareholder of Utavia is the CEO of Rapala, Jorma Kasslin, with ca. 43% shareholding. The other shareholders are Board members or managers of the Group. In total, Utavia has some 40 shareholders. On June 29, 2006, Utavia purchased

from De Pruines Industries (DPI) 1 610 000 shares representing ca. 4.08% of the issued share capital and voting rights in Rapala. DPI is a subsidiary of VM&C. On December 31, 2009, VM&C owned directly or through its subsidiaries approximately 28.1% of the issued share capital and voting rights of Rapala.

In the shareholders' agreement, Utavia has undertaken to vote in Rapala's General Meetings of shareholders in favor of the resolutions approved and/or submitted by VM&C and authorized VM&C to exercise the voting rights attached to the Rapala shares held by it. VM&C has a right of first refusal to any shares sold by Utavia. The parties to the shareholders' agreement undertake to use and exercise the votes that they control at the General Meetings of Rapala so that two persons designated by VM&C and one person designated by Utavia (the first person appointed being Jorma Kasslin in this respect) are appointed as members of the Board.

Share-Based Incentive Plans

The Group had three separate share-based payment programs in place on December 31, 2009: one stock option program, one synthetic option program settled in cash and one share reward program settled in shares. The following share-based payment programs are currently in place mainly for senior and middle management (2004 program is also for non-executive Board members):

- The 2004 Share Option Program: A maximum of 1 000 000 options were issued to 106 managers: 500 000 options exercisable between March 31, 2007 and March 31, 2009 at an exercise price of EUR 6.16 per share (2004A), and 500 000 options exercisable between March 31, 2008 and March 31, 2010 at an exercise price of EUR 6.41 per share (2004B). On March 31, 2009, the exercise period for options issued under the Share Option Program 2004A expired. The exercise price of 2004B option represents the weighted average share price in March 2006. The exercise price shall be reduced by the amount of dividends

* Number of shares includes 340,344 own shares held by the parent company.

distributed after the subscription period for option rights has ended and before the commencement of the share subscription period. The outstanding 2004B options represented 1.1% of the company's outstanding shares on December 31, 2009.

- The 2006 Synthetic Option Program: A maximum of 1 000 000 options were issued to 116 managers: 500 000 options exercisable between March 31, 2009 and March 31, 2011 at an exercise price of EUR 6.44 per share (2006A), and 500 000 options exercisable between March 31, 2010 and March 31, 2012 at an exercise price of EUR 6.44 per share (2006B). Exercise price represents the weighted average share price during the period from January 1 to March 31, 2006. The share-specific cash value will be determined in accordance with the end price on the test date (i.e. vesting date) or, as the case may be, on an additional test date. End price is the volume weighted average price of the share during the ten trading days before the test date. If at test date the difference between the exercise price and the end price (including the dividend adjustment) is positive, the reward will be paid. If the difference between the exercise price and end price on the test date (including the dividend adjustment) is negative, the end price will be determined again on an additional test date, which is the six, twelve, eighteen and twenty-four months' anniversary of the test date. If the difference between the exercise price and the end price is positive on any of the additional test dates, the reward will be paid and this incentive scheme shall automatically expire. The exercise price shall be reduced by the amount of dividends distributed after the subscription period for option rights has ended and before the commencement of the share subscription period.

- The 2009 Share Reward Program: In 2009, the Board approved a new share-based incentive plan for the Group's 50 key employees. The 2009 Share Reward Program's earning period commenced on January 1, 2009 and will end on December 31, 2010. The potential reward from this program will be based on Rapala's earnings per share in 2010 and it will be paid as Rapala's shares in 2011. The gross rewards to be paid on the basis of this program will correspond to the value of a maximum total of 200 000 Rapala shares.

For more details on share-based payments see note 29 in the consolidated financial statements.

Management Shareholding

On December 31, 2009, the members of the Board and the Executive Committee held directly a total of 1 795 319 Company shares and indirectly through a controlled corporation 1 160 000 Company shares, corresponding to 7.5% of all shares and voting rights. If the share option program 2004B was exercised in its entirety, shareholdings and aggregate voting rights held by the members of the Board and the Executive Committee would increase up to 7.8%. Details of management shareholdings are given on page 60.

Trading and Performance of the Company's Shares

The Company share (RAP1V) is quoted on the NASDAQ OMX Helsinki. The 2009 closing price on December 31 was EUR 4.97. The highest price in 2009 was EUR 5.16, the lowest price EUR 3.50 and the average price EUR 4.46. The share price increased 42.8% in 2009. The OMX Nordic Mid Cap price index increased 55.5% in 2009. A total of 3 138 597 Rapala shares were traded in 2009. This represents 7.95% of all shares on December 31, 2009.

At the end of 2009, the market capitalization of all outstanding shares, excluding own shares, was EUR 194.5 million. Earnings per share (basic) were EUR 0.31 (EUR 0.45 in 2008). For more share related key figures see page 42.

Dividend

The Board proposes to the AGM that a dividend of EUR 0.19 per share will be paid for the financial year 2009.
